Juniata College
Huntingdon, Pennsylvania 16652
(814) 643-4310

July, 1986

Dear Alumni and Friends,

July 1 marked an important milestone for Juniata College. Dr. Frederick M. Binder retired as President of the College and Dr. Robert W. Neff has assumed the duties of that important office.

This issue of the Bulletin contains a story about the alumni recognition of Dr. and Mrs. Binder held in conjunction with Reunion Weekend. In his 11 years as President, Dr. Binder made many positive contributions to the institution. Juniata is stronger academically and financially because of Dr. Binder's leadership, for which we all owe him our thanks. We wish him success during his year as a visiting professor at the University of Leeds in England.

We also extend a warm welcome to Dr. Neff, his wife, Dorothy (Rosewarne '59), and their daughter, Heather. Dr. Neff brings to Juniata excellent administrative skills and academic credentials, which will make a strong institution even stronger.

Juniata's alumni have always been very faithful to their alma mater. They continue to contribute their time, energy and money, and many send their children to be educated on College Hill. Dr. Neff can be assured of continued support from Juniata's alumni, and I know you will join me in wishing him a long and productive tenure as President.

Sincerely,

Helen Schmidlen Adams

Juniata College is an independent, privately supported coeducational institution committed to providing a liberal arts education to qualified students regardless of sex, race, religion, creed, color or handicap. Its policies comply with requirements of Title VII of the Civil Rights Act of 1964, Title IX of the Education Amendments of 1972, and all other applicable federal, state and local statutes, regulations and guidelines.

2 Alumnus writes about his recent trip to South Africa.

A Look Inside South Africa

By Henry R. Gibbel '81

If your travel agent was to suggest a place to visit on your next world tour, it's a sure bet South Africa wouldn't be in the top three. When I was handed an application for a chance to spend six weeks in Southern Africa, I was more than a little apprehensive. After being bombarded by the negative press on South Africa, I needed some reassurance that I wasn't headed for a combat zone.

The tour was being sponsored by the Rotary Foundation as the second half of a group study exchange. After an interview and selection process, I found myself preparing to visit a part of the world known only to me through the pages of *Newsweek* and *Time*, and clips on the 6:30 news. What I found changed my initial impressions and left me with a better understanding of a country that faces an extremely complicated future.

A few weeks in South Africa doesn't qualify me as an expert on South Africa and the policy of apartheid. I will never claim to be one, nor do I have the solution to the country's problems. However, I would briefly like to share my experience and impressions of the visit.

After touring Malawi and Zimbabwe, our six-man team entered the Eastern Transvaal of South Africa. By nature of the exchange, we were hosted by and stayed with Rotarians. The membership of the clubs visited was mostly white. It didn't take long to realize all conversations would sooner or later (mostly sooner) turn to race and politics. Regardless of descent, Afrikaaner or English, everyone was keenly aware of the apartheid problem. Although some whites we talked with seemed at times to be justifying the policy of apartheid, all realized change has to take place and were ready to accept it. The major question was how fast should this change occur. A common undertone among the whites was a sense of fear of losing all they have worked for, even their lives, if the country rapidly changed to black rule. However, only occasionally did we meet a white who would quietly admit he was thinking about leaving the country. The Afrikaaners especially have a strong sense of identity and claim they will never leave their South African home.

When the team reached the Pretoria and Johannesburg area, we had the opportunity to speak with non-whites, visit the starkness of a rural homeland, and witness the overcrowding of an urban township. What we saw was a striking contrast to life in the white areas. A colleague and I spent an

Although whites and blacks are now allowed to use the same beaches, this old sign is a reminder of South Africa's continuing apartheid policy.

afternoon with an urban black living in Mamalodi, a Pretoria township.

In Mamalodi, as in Soweto, we found hundreds of thousands of blacks living elbow to elbow. The homes, although considerably well constructed, were built a few feet from each other. Green vegetation was scarce and garbage collection was evidently a problem.

In the comfort of his modest home shared with his parents, aunts, brothers and sisters and their families, our host expressed a liberal black view. "The blacks have been suppressed too long and a change must happen now!" Although he was not militant, I got the impression the blacks had a sense of urgency for a major change. Equal status with the whites was called for on a one man, one vote basis; along with

“Regardless of descent, Afrikaaner or English, everyone was keenly aware of the apartheid problem.”

abolishing the Group Areas Act which restricts where the different races can live.

Change of this magnitude, I found, will not be easy. There are many factors which complicate the abolition of apartheid. Can the black African culture successfully mix with the white Western culture, and conversely? If a black is to rule, from which tribe will he come and will the other major tribes be satisfied with his leadership? Will the blacks be satisfied if a white man is to rule? Would the economic and strategic wealth now held by the whites be jeopardized if a black were to govern? Will there be an insurgence of Communist influence as has happened in other black African countries which have gained independence? How long can the white government retain control in a world that is increasingly applying pressure for human rights? There will be change in South Africa, it is inevitable.

A lot of changes already have taken place. These changes have been too fast for some and too slow for others. Gone are the laws against inter-racial marriage, segregation in public areas and changes to the Pass Laws, among others. I believe the Group Areas Act will be the next policy of apartheid to go. However, the absence of blacks in government will be the stumbling block. Can the transition to blacks having a voice in politics be made without widespread violence?

During our stay, we did not personally see signs of violence. However, we did see concentrations of police and convoys of army personnel. At this point in time, it appears the violence in South Africa is predominantly black against black and confined to the black townships and rural areas. Daily newspaper accounts reported arsons, torturings and murders. It appears certain black elements are using terror as a tool to raise support for radical change. An intense pressure among the black population is mounting. Can this pressure be alleviated without an all out black/white violent confrontation?

Throughout our tour of the country, we came to enjoy the beauty of South Africa. We visited several industrial sites and realized the economic and strategic importance of South Africa. We toured throughout the natural areas and were awed by the unspoiled beauty of the landscape. The freedom of the African wildlife in Krueger National Park and the unparalleled splendor of the Cape Town region greatly impressed us. As Americans, we were well received as all races extended their warmest hospitality. In total, the travel and cultural experience was extremely rewarding and I extend my thanks to Rotary International for its sponsorship.

Through a growing appreciation for the potential of
(continued on next page)

Rural African dwellings such as these are quite common in the remote regions of Southern Africa.

South Africa, I can only wish the resolution to the practice of apartheid can be made without the ugliness of a racial war. The problem is so complex and multifaceted that it is difficult for the average American, including myself, to blindly pass judgment and demand immediate changes. There is only the hope that such a prosperous country can make the transition without ruinous violence and continued loss of life. When and how will this transition take place? I am afraid "only time will tell."

Editor's Note: Henry R. Gibbel '81, property underwriting supervisor with Lititz Mutual Insurance Company, Lititz, PA, was part of a six-man Rotary International Group Study Exchange Team between District 739 in Central Pennsylvania and District 925 in Southern Africa. The team members were non-Rotarians between the ages of 25 and 35 and were accompanied by a Rotarian team leader. The six week (April 2-May 16) cultural and vocational exchange toured the countries of Malawi, Zimbabwe, Swaziland and South Africa. □

The black township of Soweto, located outside of Johannesburg, has been the scene of much of the recent violence in South Africa.

Mike Scialabba: A Man With a Heart

By Joseph M. Scialabba '86

The Hershey Medical Center operating room was crowded early Easter morning 1985, when Michael J. Scialabba '52 was wheeled in just after midnight. Scialabba, a Huntingdon native and resident, was weak but alert as the 20-plus person operating team waited for its cue to begin.

The quiet room was filled with masked-covered faces when a voice from a hidden anesthesiologist asked the anxious patient where he was from. His answer would not only cause a surprise response, but a comforting one as well.

"I'm from a little town in Central Pennsylvania," Scialabba said. "Did you ever here of Juniata College?"

Immediately three people in the room answered they had not only heard of Juniata, but had gone to or graduated from the college. These skilled members of the medical profession had started their educations as Juniata pre-med students. (Attempts to find out who these three individuals are have been unsuccessful. If anyone knows their identity, please contact the Alumni Office.)

About 3 a.m. the operation began and some four hours later, the 55-year-old

Mike Scialabba '52 underwent a heart transplant at the Hershey Medical Center last spring. He now spends a great deal of time prompting organ donation programs.

Scialabba had a new heart. It was the ninth transplant ever at Hershey, and Scialabba looked back 14 months later at the event which he called a very special "Sunrise Service."

"It is really amazing the amount of Juniata people involved in my particular

transplant," Scialabba says. "I remember thinking a few days after the operation about the high percentage of Juniata people in that operating room. That made me feel pretty good."

Scialabba, who spent many days walking the hospital with a Juniata t-

shirt as a topic of conversation, was working directly with a fellow Juniata before he became a transplant patient. Dr. Rueben Hess '81, graduated from the Hershey Medical School and was assigned to Scialabba before the transplant.

"He (Hess) was always around," Scialabba says. "Even when he wasn't assigned to me he'd find me."

Since the April 7, 1985, transplant Scialabba has not had an easy time. The medication which prevents rejection of the heart also causes many side effects, including lowered immunity — which led to an infection and abscess of the brain that required surgery for Scialabba in November. He also broke his back in February.

However, despite these setbacks, Scialabba's one-year examination was encouraging. "I did very well in my 50,000 mile check-up at Hershey," he says. "I had three days of extensive testing on my heart and I received a super bill of health. Everything's terrific."

Scialabba has no restrictions now. He can do anything he feels able to do. He is on an unrestricted diet and exercises regularly, walking/jogging over three miles every morning. But, there are still limits.

"I am very cautious of infection," Scialabba says. "I avoid large crowds, especially indoors. I don't mind a Juniata football game, but I won't go into a filled gym. I've also learned to eat out before and after prime meal times."

More than a year after receiving a new heart Mike Scialabba is basically enjoying life. But, he is also busy as a self-appointed chairman of the Hershey heart transplant group.

"I give every new recipient a t-shirt that reads 'I got my heart at Hershey,'" Scialabba says. "We talk about things, and try to help the public understand about transplants — especially how easy it is to be a donor."

Scialabba has spoken to groups at Juniata as well as J.C. Blair Hospital in Huntingdon. He also has traveled to the Carlisle School District and Williamsport Hospital to speak.

"I emphasize the fact that we don't want anyone to have to be a donor by driving recklessly or drunk," Scialabba explains. "Don't be a donor by staying safe and healthy," is something I say often. But, we also have another saying: 'Don't send your organs to Heaven; Heaven knows we need them here.'"

Livers and hearts are the most difficult to match, according to Scialabba, while kidneys have become the most often performed major organ transplant. Scialabba notes there is still a shortage in all categories of donor organs.

"There is still a need for more donors," Scialabba says. "Anyone can become a donor by filling out a simple donor card and keeping it on your person at all times."

"You don't have to be a pre-med student to add another Juniata name to

the transplant team," Scialabba notes. "Consider organ donation as a chance to give someone, like a fellow Juniata, a second chance."

For more information consult your physician, your local Kidney Foundation, Eye Bank, County Medical Society or the Pennsylvania Department of Health, Box 90, Harrisburg, PA, 17108 or call toll free 1-800-692-7254.

Editor's Note: Joe Scialabba '86, a student assistant in the Public Relations Office for four years, is Mike Scialabba's nephew. □

Women Subject of Two Books Written by Alumni

The literary world has been enriched this year, thanks to the efforts of two Juniata alumni — Carolyn (Ambler) Walter '66 and Janet Kauffman '67.

Dr. Walter's book, *The Timing of Motherhood*, was published in April by the D.C. Heath Co. of Lexington, Mass., and goes beyond the usual focus of how the timing of motherhood can limit, postpone or prolong a woman's career. Dr. Walter's study is concerned with exploring how a woman's age affects her emotions and actions as a mother, and how it affects the development of her child.

The book follows the life patterns of two groups of mothers — "early-timers," whose first child was born when they were under 25, and "late-timers," who postponed motherhood until they were over 30. In each case, Dr. Walter focuses on the quality of the mother-child relationship, on how they change and grow reciprocally, and how they balance the needs to hold on and to let go at appropriate times.

Dr. Walter, who received her Ph.D. in social work and social research from Bryn Mawr College in 1984, is an assistant professor in the School of Social Work and Community Planning at the University of Maryland, Baltimore. She and her husband John '66, an

attorney in Philadelphia, live in Swarthmore, Pa. with their two children.

The characters in Janet Kauffman's novel *Collaborators*, would be ideal study subjects for Dr. Walter. Published by Alfred A. Knopf of New York, Dr. Kauffman's novel explores the bonding between a mother and her young daughter, who finds it impossible to recognize herself as separate from her mother. Her life is defined by her mother's actions, thoughts and tastes.

The beginning of the novel is an altered version of Dr. Kauffman's short story *My Mother Has Me Surrounded*, published in 1981 as part of her collection entitled *Places in the World a Woman Could Walk*.

In a recent *New York Times* review, author Ursula Hegi stated, "Collaborators is a novel that needs to be read slowly, word by word, image by image, to allow Janet Kauffman's extraordinary gift for language and character development to unfold. She brings a poet's sensitivity to her prose. . . ."

Dr. Kauffman, who received her M.A. and Ph.D. degrees from the University of Chicago, lives on a farm near Jackson, Mich., and teaches at Jackson Community College. □

Soap Star Talks About Peace

By Natalie S. Love

It was a night of contrasts as Charles Shaughnessy (Shane Donovan of the NBC daytime serial *Days of Our Lives*) brought the message that "War, all war, is obsolete," to the Juniata campus May 17. He contrasted the conflict-plagued though controllable world of the soaps in which we move from denouement to denouement, with the conflict-plagued real world in which there are no pat answers, no guaranteed denouements; and between pre-1945 thinking and post-1945 reality.

Committed to the Beyond War movement which promotes peace through knowledge and understanding, Shaughnessy came to Juniata to support the school's Peace and Conflict Studies program dedicated to finding peace through understanding the nature of conflict.

Shaughnessy portrayed the reality of the nuclear age as a rollercoaster running out of control with no one at the brake, and within sight up ahead, a gaping hole in the tracks. "We know the danger is there," he said, "and we want to enjoy what we can for as long as we can.

"The soaps allow us to accept this. We know what the answers are . . . know that these are not our problems. And we know everyone's going to be back tomorrow. The danger is when we perceive fantasy as reality."

The reality we must face today, he said, is that, "In 1945 something happened . . . we unleashed a power we could not control . . . a power that the user cannot always protect himself against."

For the first time in history, "Man had the power to destroy not just lives, but life itself . . . had the ability to obliterate the future. In the past when wars were fought,

someone won and someone lost . . . lives were lost but life went on.

When the bomb dropped on Hiroshima, everything changed . . . everything that is except our basic concept of conflict." Shaughnessy said.

It is toward changing this conceptualization of conflict that the Beyond War movement channels its

resources. For as long as man views war and violence as the means to an end, the movement asserts, he will employ whatever tools he has at his disposal in the attempt.

The development of nuclear weapons, Shaughnessy said, has made all war, not just nuclear war obsolete. This in turn means conventional warfare, too, is

Days of Our Lives star Charles Shaughnessy visited Juniata in May to promote the college's Peace and Conflict Studies program.

outmoded. When push comes to shove and one side finds itself on the verge of losing, the temptation to reach for the ultimate weapon will be irresistible. "There hasn't been a weapon invented that hasn't been used," he said, challenging the notion that the world has nuclear weapons but will never use them.

Though he believes war is obsolete, Shaughnessy does not advocate disarmament. "To do so at this time would be ludicrous," he said, "man has the ability to make more, so simply disarming ourselves would not be the panacea . . . there must be a change in thinking or the threat is still there."

The nuclear weapons cashe boasts the firepower equivalent of 6,000 World War IIs or 1,120,000 Hiroshimas. That we can continue to war and still survive, therefore, is an attitude that pre-dates 1945, the 31-year-old actor pointed out.

That we have a weapon no one would ever be foolish enough to employ is not a new concept. The inventor of the rapid-fire machine gun, too, thought he had "uninvented war."

But the greatest illusion of all, he stressed, is that "I (the individual) don't make a difference." It was the viewer, the individual letter-writer, he said, that transformed his character on "Days" from that of a three-day sinister butler to Capt. Shane Donovan, top agent in the I.S.A. "To the networks, one letter equals about 10,000 people. You write the soaps. You make the difference. There and here."

On the small screen, Capt. Shane Donovan, I.S.A. agent and resident good guy is dedicated to the preservation of law and order in Salem and the United States of America. Off screen, Charles Shaughnessy is committed to the preservation of something even more noble than the good people of Salem and the general population of the United States. Shaughnessy is dedicated to the preservation of mankind, during a time when the world is faced with a deadly force the likes of which history has no

complement.

In order to help combat this deadly force, the Eton and Cambridge educated actor emphasized the importance of peace studies programs like Juniata's. "Education is the key. The bottom line is either we all die together or we learn to live together. There are no alternatives," Shaughnessy said.

Responding to the argument that though we share the same biology, we are culturally polar, and how, therefore, can we expect to unite the world in a common reverence for mankind, Shaughnessy said, "The diversity is enormously strong. And as far as the cultures that see death as wonderful, the task will be a difficult one . . . but these are not innate feelings, they are imposed by external forces — religious leaders, politicians, etc., as a means of keeping the people satisfied . . . I don't believe that in the early morning hours these people actually believe that way. I don't believe it

comes naturally to human beings to welcome death."

He likened conflicts between nations with conflicts among family members. "We fight with our families, with our brothers and sisters, but we wouldn't think of blowing up the house. But that's exactly what we're up against. It's like stuffing sticks of dynamite in the basement."

Understanding war and peace is the most important lesson individuals can learn, according to Shaughnessy. "If we don't examine the nature of conflict, if it's not taken seriously, then all the other courses of study will be obsolete . . . It's not knowing all the answers that will lead us to understanding, but asking the right questions. Those questions will come from programs such as Juniata's."

Editor's Note: Natalie S. Love is managing editor of the Huntingdon Daily News. □

Actor Charles Shaughnessy chats with Juniata students Karen Fonner '86 and Lisa Smoker '86 during a dinner to benefit the Peace and Conflict Studies program.

AROUND CAMPUS

Commencement '86

Graduates Urged to Help Others

Citing the need for more cooperation between "hi-tech" and "no-tech" countries, Dr. Wayne M. Meyers '47, chief of the Division of Microbiology, Department of Infectious and Parasitic Diseases Pathology, at the Armed Forces Institute of Pathology in Washington, D.C., urged graduating seniors to put their knowledge to work for the less fortunate.

Dr. Meyers was the featured speaker at Juniata's 107th Commencement ceremony held Sunday, May 25.

A total of 249 students participated in the afternoon ceremony on campus. Bachelor of arts and bachelor of science degrees were presented to 223 May graduates while 26 students were recognized as candidates for August graduation. Two students received

their degrees *summa cum laude* with Alan E. Thomas of Meyersdale graduating with the highest grade point average in the class. The other *summa cum laude* graduate was Todd A. Sponsler of Altoona.

Seven students were awarded their degrees *magna cum laude*, and 10 other students received their degrees *cum laude*.

In his address, Dr. Meyers commented on the many advances that technology has made possible, particularly in medical research. "In the hi-tech world, our medical research will continue to proliferate and become more complex, especially in the diseases that afflict us here," Dr. Meyers said, but he challenged scientists and the government to put as much effort into other areas. "Research in the major tropical diseases of the world

are meagerly supported because they cause us little physical, emotional or economic pain."

Dr. Meyers used two well-known diseases to illustrate his point. "Would more than \$250 million have been budgeted by the federal government for AIDS research in the USA in 1985 if the disease was a problem confined to Central Africa? By comparison, in the same year (1985), leprosy research received \$1.5 million, through the National Institutes of Health, and although the causative germ of leprosy was identified 113 years ago, it has not yet been grown in test tubes."

Dr. Meyers is a leading expert in the causes and treatment of leprosy and from 1961-73, served as a missionary physician with the American Leprosy Mission in the African nations of Burundi and Zaire.

During Sunday's ceremony, Dr. Meyers was presented with an honorary Doctor of Science degree from Juniata. Noting his humanitarian work and many contributions to medical research, the honorary citation reads, "he has taught us that qualities of vision and mercy are not incompatible nor inconsistent with the most rigorous disciplines of scientific investigation and has shown us that one can live a vocation that is intellectually open and morally focused."

The honorary degree was conferred by Juniata President Frederick M. Binder. Dr. Meyers was introduced by Dr. Bruce B. Montgomery '56, a Bryn Mawr physician whose son, John H. Montgomery, was a member of the

Dr. Wayne M. Meyers '47 (second right) delivered this year's Commencement address and was awarded an honorary Doctor of Science degree. Dr. Bruce B. Montgomery '56 (second left) presented Dr. Meyers for the degree. Also pictured are Dr. Charles C. Ellis '40 (left), chairman of the Board of Trustees and Dr. Frederick M. Binder (right), president.

graduating class.

Also during Sunday's ceremony, Dr. Binder presented a special award to Rep. Samuel E. Hayes, Jr. of Tyrone in recognition of exemplary leadership for the Commonwealth, dedicated service to the 81st district and energetic support of higher education.

"In Harrisburg, Sam's work on the House Education Committee has earned him the reputation of being the 'Dean of Education on the Hill,' " Dr. Binder said. He also praised Hayes for his unique style of "quiet diplomacy" and for the many road and bridge projects that have improved the region.

Dr. Charles C. Ellis '40 of Washington, D.C., chairman of Juniata's Board of Trustees, presided at the Commencement ceremony and Dr. Joseph V. Stewart, vice president and dean of academic affairs, presented the graduates for their degrees. □

Rep. Samuel E. Hayes, Jr. (center) is flanked by Dr. Charles C. Ellis '40 (left) and Dr. Frederick M. Binder. Rep. Hayes was awarded a special citation from the college for his efforts on behalf of higher education in Pennsylvania.

Hagerstown, Md.

The award provides a \$2,000 stipend to a professor who contributes to the development of the individual's department and the college as a whole. Teaching effectiveness, scholarly activities, service beyond the campus and length of service to the college also are important factors.

Nominations for the Beachley professor are received from students, faculty, administrative personnel, alumni and trustees. The final selection is made by the college's president, dean of academic affairs, student government president and the three most recent recipients.

The last three Beachley Award recipients have been Dr. Robert P. Zimmerer, professor of biology (1985), Dr. Duane F. Stroman, professor of sociology (1984) and Dr. James J. Lakso, professor of economics and business administration (1983).

Mitchell joined the Juniata faculty in 1967 as an assistant professor. He was promoted to associate professor in 1976 and to professor in 1982.

A graduate of Westminster College, Mitchell received his Ph.D.

from Vanderbilt University and also has studied at the University of Sheffield, England and the University of Massachusetts. Mitchell is a former chemist with the Naval Research Laboratory and has done extensive research in the fields of X-ray crystallography and coal gasification and liquefaction.

In 1985, Mitchell received a two-year, \$76,000 grant from the National Science Foundation and a two-year, \$20,000 Petroleum Research Fund grant from the American Chemical Society to study solid state coextrusion of polymers.

In announcing Mitchell's selection, Juniata President Frederick M. Binder praised his work with students in both the teaching and research fields. "As a professor, Dr. Mitchell's teaching technique extends beyond the classroom into the research laboratory. Hundreds of students have benefited from Dr. Mitchell's wisdom and guidance."

Funded by the Christian R. and Mary F. Lindback Foundation of Philadelphia, the Lindback Award provides a \$500 stipend. Selection criteria includes contributions to the

(continued on next page)

Two Teaching Awards Given to Professors

Distinguished teaching awards were presented to two Juniata College faculty members Sunday, May 25 during the college's 107th Commencement ceremony.

Dr. Donald J. Mitchell, professor of chemistry, received the 19th annual Beachley Distinguished Professor Award while Loren K. Rhodes, assistant professor of mathematics and computer science, was presented with the ninth annual Lindback Foundation Award for Distinguished Teaching.

The Beachley Award was established by Donovan R. Beachley, Sr. '21, a member, emeritus, of the Board of Trustees; Donovan R. Beachley, Jr. '47, a member of the Board of Trustees; and Mrs. Donovan R. Beachley, Jr., all of

total educational effort of the college, and outstanding work by a junior faculty member who has served the college for seven or fewer years.

The award recipient is selected by Dr. Binder, who is assisted by a committee of faculty members. Last year's recipient was Dr. Thomas J. Baldino, associate professor of political science.

A native of McVeytown, Rhodes joined the Juniata faculty in 1980 as an instructor and was promoted to assistant professor in 1983.

Rhodes holds B.S. and M.S. degrees in computer science, both from The Pennsylvania State University. While a graduate student, Rhodes served as a part-time assistant for Penn State's department of education, working with a wide-range of computer based activities.

In presenting the award to Rhodes, Dr. Binder said, "Professor Rhodes has played an important role in the success of Juniata's computer science program. He has contributed a great deal of time and energy to the Academic Computer Center and has enriched the lives of his students." □

Pictured are (left to right): Dr. Charles C. Ellis '40, chairman of the Board of Trustees; Dr. Joseph V. Stewert, vice president and dean of academic affairs; Loren K. Rhodes, recipient of the Lindback Foundation Award for Distinguished Teaching; Dr. Donald J. Mitchell, recipient of the Beachley Distinguished Professor Award; and Dr. Frederick M. Binder, president.

members of the Society when their lifetime giving equals or exceeds \$100,000.

In welcoming the members into the newly-established organization, Dr. Frederick M. Binder said "you are individuals who understand the potential of Juniata, who espouse a great vision of Juniata's future, and who are willing to express your conviction with an extraordinary level of support...Your association with Juniata has enriched it, not only financially, but also by your service and commitment. You provide the modern leadership that is vital to take Juniata from its present preeminent academic position into an era of even greater promise."

The decision to name this special society after Juniata's first president was carefully made. James Quinter was a leader in the educational reform movement of the Brethren Church in the second half of the 19th century. The founding of the Brethren Normal School in Huntingdon in 1876 fulfilled a vision that he had cherished for many years. When Jacob Zuck's untimely death threatened the continued existence of the school, Quinter's leadership assured the founders that the fledgling Normal School would carry on to become Juniata College.

Binder noted that the combined lifetime giving of all members of the

Quinter Society represents \$5.25 million. Their commitment is further shown by the fact that by May, 1986, the Quinterians had already accounted for over \$311,000, or one-fifth of the cash received by Juniata by that date.

In addition to invitations to special Quinter Society evenings, members receive a distinctive gold lapel pin, inscription of the names of the permanent Quinter Society members on a plaque to be mounted in the foyer of Ellis College Center, and prominent listing in the annual Report of the President. The president and trustees of Juniata College extend their thanks and wish to give special recognition to the following charter members of the Quinter Society:

Dr. and Mrs. John C. Baker '17
Mrs. Beulah K. Baugher
Dr. and Mrs. Donovan R. Beachley, Sr. '21
Mr. and Mrs. Donovan R. Beachley, Jr. '47
Mr. Albert H. Blough '58
Mr. and Mrs. F. Sam Brumbaugh '54
Dr. and Mrs. W. Clay Burkholder '35
Dr. and Mrs. Harry R. Cramer '41
John McN. Cramer, Esq. '63
Mr. and Mrs. Earl D. Croner '38
Mrs. Edith H. Cutrell '27
Dr. and Mrs. Dale W. Detwiler 'H83

Quinter Society Formed

The Juniata College Quinter Society has been formed as a special recognition for the contributions and support of Juniata College's major benefactors.

The organization held its inaugural meeting May 3 with a reception and banquet in Shoemaker Galleries, followed by an evening of music and theater as the faculty and students of the Juniata Music Department presented Cole Porter's "Kiss Me Kate."

Membership in the Quinter Society is limited to those whose annual giving has reached \$5,000 or more a year. Quinterians become permanent

Sigma Iota Rho Chapter Established at Juniata

A new chapter of Sigma Iota Rho, the international relations honor society, has been established at Juniata College with the first membership inductions conducted at a special banquet held on campus in May.

Established in 1984, Sigma Iota Rho works "to promote and reward scholarship and service among students and practitioners of international studies and global relations, and to foster integrity and creative performance in the conduct of global affairs." Juniata's "Iota Chapter" is one of the 21 initial charter chapters in the country. There are currently more than 30 college and university chapters.

At this year's banquet, eight students were inducted into Sigma Iota Rho in recognition of excellence in the field of international relations. The eight are: Steven A. Camarota '87 an international relations/pre-law major from Princeton Junction, N.J.; Cynthia L. Cooper '86, a communications major from Covington; Cynthia L. Corle '86, a Russian/political science major from Claysburg; Heidi J. Hess '86, a French/secondary education major from Beavercreek, Ohio; Karen J. Krasznayolgyi '86, a biology/German major from Nazareth; Lisa A. Smoker '86, an international relations major from Lancaster; Tracy L. Stough '86, a marketing/Spanish major from Adamsburg;

and Judith A. Vachon '86, a peace and conflict studies major from Pittsburgh.

In addition to the student members, three members of the college staff were inducted into the organization as Distinguished Charter Members.

Dr. Frederick M. Binder, Juniata's president, was inducted in recognition of his long-term commitment to international education and his establishment of the Office of International Programs at Juniata. During his 11 years as president, Dr. Binder actively pursued international study programs such as the Juniata/University of Leeds junior year abroad program in England.

Also inducted was Dr. William E. Russey, professor of chemistry. Russey was recognized for his efforts in establishing the foreign exchange program in 1977-78 between Juniata and the University and Polytechnic Federation at Lille, France. Russey laid the groundwork for the current exchange program which includes almost all academic departments at Juniata. Exchanges now exist with institutions in England, France, Germany, Spain and Japan.

George T. Dolnikowski '52, associate professor of Russian and German, was inducted for his many contributions to the foreign studies program. Dolnikowski came to Juniata in 1954 and since then, has

Dr. Frederick M. Binder signs the Sigma Iota Rho register as Dr. William E. Russey looks on. Both were inducted as Distinguished Charter Members of the international relations honor society.

infected countless students with his grace, wit, humor and passion for learning.

Seven other students were recognized at the banquet as honored guests. Six of the individuals were foreign students studying at Juniata this year and the seventh, Timothy J. McCarthy '86 of Nazareth, is a chemistry major who studied in Germany last year.

Dr. William C. Vocke, associate professor of political science and director of international programs and Klaus A.G. Jaeger, assistant professor of German, both founding members of the chapter, served as coordinators of the banquet. □

Alumni Enjoy Reunion Weekend

Awards Go to Alumni

The prestigious Alumni Service and Alumni Achievement awards were presented to two distinguished graduates during the annual Alumni Association Luncheon May 31.

Helen H. Mierley '28 of Huntingdon received the service award while Dr. Erwin L. Hahn '43 of Berkeley, Calif., was the recipient of the achievement award.

Mrs. Mierley has served the college as a member of the Women's League, Huntingdon Area Alumni Club, a Class Fund Agent and for more than 50 years, a member of the Founders Club. In addition, she served on the President's Development Council for many years, and is one of only two individuals who has traveled on 19 Juniata Alumni Tours. Through her support of the Kersey Mierley Scholarship, Mrs. Mierley has helped educate many Juniata students.

After graduating from Juniata, Mrs. Mierley went on to receive her M.A. degree in French from The Pennsylvania State University and also studied at The Sorbonne in Paris. For more than 40 years, she taught school in Philipsburg, Orbisonia, Jamesburg, N.J. and from 1935 to 1962, at Huntingdon Area High School.

In presenting the award to Mrs. Mierley, Thomas N. Rupert, Jr., '63, president of the National Alumni Association, said, "The exemplary life you have lead, and the energy and vitality that have become your trademark have made you one of Juniata's most distinguished

This year's Alumni Service Award was presented to Helen Hess Mierley '28 (second left) while Dr. Erwin L. Hahn '43 (second right) received the Alumni Achievement Award. Also pictured are Mrs. Natalie Hahn (left) and Thomas N. Rupert, Jr. '63, president of the Alumni Association.

alumni."

An award-winning physicist and a member of the University of California, Berkeley, faculty since 1955, Dr. Hahn left his mark on the scientific world early in his career. While a research associate at the University of Illinois, where he received his Ph.D., Dr. Hahn discovered "spin echoes" in magnetic resonance. Since then, his research has continued to develop this discovery and apply it to other areas of physics.

At Berkeley, Dr. Hahn has concentrated on the study of the transient dynamics of coherent states in physical systems. His methods are now regarded as standard research techniques in physics and chemistry throughout the world. In addition, Dr. Hahn's invention of high resolution pulsed nuclear magnetic resonance

revealed a new type of coupling in molecules. This new kind of spectroscopy has become one of the chief tools of the organic chemist in determining molecular structure.

Dr. Hahn has been the recipient of numerous prizes, awards and honors, including an honorary Doctor of Science degree from Juniata. His greatest honor came in 1984 when he was named co-winner of the prestigious Wolf Foundation Prize in Physics.

"For your personal and professional accomplishments as an alumnus of Juniata College, it is both an honor and a pleasure to present you this citation of achievement," Rupert said during the awards ceremony. □

Binders Honored

Dr. and Mrs. Frederick M. Binder were honored by the National Alumni Association at a variety of events during Reunion Weekend. Dr. Binder retired June 30 after 11 years as Juniata's president.

Members of the Alumni Council were given an opportunity to extend their best wishes to the Binders during an informal reception Saturday morning. Dr. Binder told the Council members how much he appreciated their support over the years and commended them for their hard work and dedication. "You have made my job so much easier," Dr. Binder said. "I knew I could always turn to the alumni for support." Approximately one-third of Juniata's alumni population graduated during Dr. Binder's administration.

During the annual Alumni Association Luncheon, Dr. and Mrs. Binder were presented gifts from the college's alumni. Mrs. Catherine Miller Metz '38 of Belleville presented Mrs. Binder with a handmade quilt in colors of blue and gold, the college's official colors. Thomas N. Rupert, Jr. '63, president of the Alumni Association, presented Dr. Binder with an original oil painting depicting the president's hobbies, career and accomplishments.

Saturday evening, more than 250 alumni, friends and colleagues gathered at the Raystown Country Inn for a gala in honor of the Binders. Several members of the community took the opportunity to pay tribute to the Binders.

Dr. Craig A. Eisenhart '70, a member of the board of the Huntingdon County Unit, American Cancer Society, presented Dr. Binder with a Certificate of Appreciation "for notable service in the crusade to conquer cancer."

Huntingdon County

President Frederick M. Binder admires the painting given to him by the college's Alumni Association.

Commissioner Larry O. Sather also praised Dr. Binder for his leadership, noting the positive economic and cultural impact the college has on the entire region, including being one of the top 10 employers in the county. Sather also read a letter from the three County Commissioners wishing the Binders much success, and presented Dr. Binder with a Huntingdon County Bicentennial cap.

Rupert brought the program to a close by reading a letter from Gov. Richard Thornburgh praising Dr. Binder for his dedication and service to higher education in Pennsylvania. □

President Frederick M. Binder admires the painting given to him by the college's Alumni Association.

President and Mrs. Binder take to the dance floor during the recognition gala held at the Raystown Country Inn.

Officers Welcomed

At the annual reorganization meeting of the Alumni Council May 31, new officers and council members were welcomed while outgoing members were recognized for their service.

Helen Schmidlen Adams '57 of Lancaster took over as president of the Alumni Council, thanking the outgoing president, Thomas N. Rupert, Jr. '63 of Bethlehem for his dedication and hard work. Rupert will remain a council member for another year.

Adams, a former school teacher, is very active in civic organizations. She has served as treasurer of the Lancaster Branch, American Association of University Women, first vice president and finance chairperson of the Penn Laurel Girl Scout Council and a member of the Board of Directors of the Lancaster YMCA.

(continued on next page)

Replacing Adams as vice president is David P. Andrews '74 of Altoona, a member of the Hollidaysburg law firm of Ebey, Routh, Black, Dorezas, Maggee and Andrews. Andrews is president of the Hollidaysburg Library Board, member of the Board of Directors of the Rotary Club and Day Care Services of Blair County, and a member of the House of Delegates of the Pennsylvania Bar Association. At Juniata, he has been a member of the Alumni Council, President's Development Council and served as a class fund agent.

The newest representative to the college's Board of Trustees is Fred P. Heydrick '55 of Frederick, Md. Heydrick works for the National Heart, Lung and Blood Institute in Bethesda, Md. (see separate story).

Also taking office Saturday were six members of the Alumni Council. They are: Michael D. Busch '77 of Palmyra, chief financial officer of The Milton S. Hershey Medical Center; Leon E. Kensinger '33 of Martinsburg, a retired school principal; Carol A. McFate '75 of New York, N.Y., assistant treasurer of MacMillan, Inc.; Phyllis Gibbs Sidorsky '49 of Alexandria, Va., librarian at the National Cathedral School; Richard P. Smith '70 of Media, a fourth grade teacher at the Episcopal Academy in Devon; and Hollis W. Zwicker '43 of Allison Park, an associate professor in the Restoration Department of the University of Pittsburgh School of Dental Medicine.

In addition to welcoming the new council members, Adams expressed her gratitude and appreciation to the outgoing members: James E. Reid '66 of Camp Hill, Carol F. Whitfield '61 of Harrisburg, R. Clifford Berg '69 of Wilmington, Del., James M. Biello '68 of New Providence, N.J., Harry L. Bryant '47 of Exton, William H. Chew '64 of Berwyn, William J. Graffious '56 of Oreland, John W. Greiner '70 of Frederick, Md. and Donna K. Moulder '72 of Pittsburgh. □

A steak and lobster dinner on the Oller Hall lawn was just one of the many activities alumni enjoyed during this year's Reunion Weekend.

Three New Trustees Elected at Meeting

Fred P. Heydrick '55 of Frederick, Md., Judith (Myers) Kimmel '66 of Shelocta and Wayne C. Patterson '60 of San Clemente, Calif. Have been named to the Juniata College Board of Trustees for three-year terms.

Past president of the Juniata College Alumni Association, Heydrick will be one of three alumni representatives on the Board and was elected by the Juniata College alumni.

Currently chief of the Contracts, Trials and Training Review Section of the National Heart, Lung and Blood Institute in Bethesda, Md., Heydrick holds an M.S. degree from the University of New Hampshire and received his Ph.D. from The Pennsylvania State University.

In addition to his service to the Alumni Council and National Alumni Association, Heydrick is vice chairman of the alumni gifts campaign for PHASE TWO of the Century II Campaign. He is a member of the President's Development Council and the

Founders Club.

Mrs. Kimmel, branch operations assistant for the Pittsburgh National Bank in Indiana, was elected to represent the Western District, Church of the Brethren, and is one of three church trustees on the Board.

Mrs. Kimmel is currently working on her M.B.A. degree at Indiana University of Pennsylvania.

Prior to joining the Pittsburgh National Bank in 1981, Mrs. Kimmel worked for the Elderton State Bank in Elderton. In addition, she has been a public school teacher in the Pittsburgh, Salisbury Elk-Lick and Armstrong school districts.

Patterson is president and chief executive officer of the Nichols Institute in San Juan Capistrano, Calif. The institute is a publicly held technology transfer corporation which operates independent clinical diagnostic laboratories, a diagnostic kit manufacturing facility and engages in extensive collaborative research with medical academicians.

Prior to joining the Nichols Institute in 1980, Patterson served

as executive vice president and treasurer of the Maine Medical Center and was interim president of the University of Vermont.

Patterson holds M.S. and Ph.D. degrees in psychology from the University of Delaware. He is the author of numerous professional articles and a member of several professional organizations.

In addition to the three new Board members, eight other trustees have been re-elected for additional three-year terms. They are: John C. Baker '17 of Essex Fells, N.J.; Harold B. Brumbaugh

'33 of Huntingdon; W. Clay Burkholder '35 of Belleville; Edith Hartman Cutrell '27 of Roslyn Heights, N.Y.; Calvert N. Ellis '23 of Huntingdon; Elmer G. Grant of Pittsburgh; and Thomas A. Martin of Washington, D.C.

The Board's officers were also re-elected. They are: Charles C. Ellis '40 of Washington, D.C., chairman; Joseph R. Good '33 of Hollidaysburg, vice chairman; John McN. Cramer '63 of Pittsburgh, secretary; and John W. Swigart, Sr. '30 of Huntingdon, treasurer. □

Joseph M. Scialabba '86

government and Center Board, and a letterwinner in golf.

William R. Huston, also of Huntingdon, has been named Juniata's new director of programming and conferences. He assumed the duties in June after serving as acting director since March.

A 1975 graduate of Kent State University, Huston has served as residence director in The Cloister since 1984, assisting in the selection, training and supervision of the residence hall staff as well as coordinating hall programs. Prior to assuming his new duties, Huston

(continued on next page)

Richard W. Phalunas, Jr. '73

College. Phalunas also has worked as a staff consultant and director of admissions for the consulting firm of Johnson Associates, Inc. and was assistant director of admissions at Wheeling College.

After receiving his B.S. degree in biology from Juniata, Phalunas studied at St. Joseph's College and The Pennsylvania State University. He received his M.A. degree in higher education administration from West Virginia University where he served as a graduate assistant and administrative intern. He also has completed doctoral studies at West Virginia.

The other new face in the admissions office belongs to Joseph M. Scialabba '86 who has been named an admissions counselor. Scialabba, who received his B.A. degree in communications in May, is a Huntingdon native.

While at Juniata, Scialabba was a student assistant in the public relations/sports information office for four years. He also wrote for the Huntingdon *Daily News* and Altoona *Mirror* and worked for WQRO radio in Huntingdon. In addition, he was sports editor of *The Juniataian*, a member of student

William R. Huston

was service representative for Huston Ford in Huntingdon.

Jill C. Shrum, the new college registrar, began her duties in March. She holds a B.S. degree in psychology from the State University of New York at Albany.

Shrum came to Juniata from Systems and Computer Technology of Malvern where she served as manager of the student computer systems at Widener University. Prior to that, she served four years as registrar at Broward Community College in Florida. She also has been an elementary school teacher and assistant librarian. □

Jill C. Shrum

Four Faculty Members Promoted by Trustees

Four Juniata College faculty members were promoted by the college's Board of Trustees during its annual spring meeting held on campus.

President Frederick M. Binder announced the board's action, naming the four involved. Promoted to professor of art was Alexander T. McBride while Dr. Ei-Ichiro Ochiai was promoted to professor of chemistry. Dr. Thomas J. Baldino was promoted to associate professor of political science and H. Christopher Peterson '74 was promoted to associate professor of economics and business administration.

McBride joined the Juniata faculty in 1970 as an assistant professor and was promoted to associate professor in 1978. He has served as chairman of the art department since 1970 and also serves as director of exhibitions.

A graduate of the Rhode Island School of Design, he received his M.F.A. degree in painting from Cornell University. A gifted painter and photographer, McBride has conducted workshops, seminars and exhibits throughout the United States and England. Prior to coming

to Juniata, McBride taught at Green Mountain College in Vermont, and Keene State College and Nathaniel Hawthorne College, both in New Hampshire.

The author of some 60 publications, including two books, Dr. Ochiai came to Juniata in 1981 as an associate professor of chemistry. He received his B.S. degree in engineering and his M.S. and Ph.D. degrees in chemistry, all from the University of Tokyo. Dr. Ochiai has been a senior visiting scientist at the University of Maryland and a research associate at Ohio State University. In addition, he has taught at the University of British Columbia and the University of Tokyo.

Dr. Ochiai is active in numerous professional organizations including the American Chemical Society, New York Academy of Science, American Association for Advancement of Science and the Chemical Society of Japan.

The recipient of the 1985 Lindback Foundation Award for Distinguished Teaching, Dr. Baldino is a graduate, maxima cum laude, from LaSalle College. He received his M.A. degree from the

University of Illinois and his Ph.D. from the University of Pennsylvania.

Dr. Baldino joined the Juniata faculty in 1979 and was promoted to assistant professor in 1982. He currently serves as chairman of Juniata's Pre-Law Studies Committee. Prior to coming to Juniata, he taught at St. Francis College and the University of Pennsylvania.

A summa cum laude graduate of Juniata, Peterson holds an M.B.A. from the Harvard Graduate School of Business Administration. He joined the Juniata faculty in 1981 and is a native of Mifflin County.

From 1974-79, Peterson was assistant general manager of Valley Rural Electric Cooperative in Huntingdon. In addition, he served as president of the Homes of Huntingdon County, a non-profit housing association, and the Pennsylvania Public Affairs Leadership Association, both from 1976-79. He also was Housing Subcommittee Chairman, Blair-Huntingdon Counties Rural Development Committee from 1974-79. □

Trever Named J. Omar Good Visiting Prof.

Dr. John C. Trever, internationally recognized for his role in the discovery and dating of the famous Dead Sea Scrolls, has been named Juniata College's 11th J. Omar Good Visiting Distinguished Professor of Evangelical Christianity.

Currently director of the Dead Sea Scrolls Project at the School of Theology at Claremont, California, Dr. Trever received his A.B. degree magna cum laude from the University of Southern California where he was a member of Phi Beta Kappa. He holds B.D. and Ph.D.

EXCEL

Century II Campaign

July 1986

An Investment
in
Enhanced Excellence

Leadership Thanked

PHASE TWO Goal is Achieved

The announcement came at the spring meeting of the Juniata Board of Trustees. The PHASE TWO goal of the Century II Campaign has been reached.

When PHASE TWO of the \$20 million campaign was launched in October, 1984, some \$10.5 million had been raised in cash and pledges. PHASE TWO was to bring the campaign to the \$14.8 million mark by June, 1986. Not only was the goal met ahead of schedule, but by May 31, more than \$15 million had been raised in cash and pledges. It is expected that by June

30, PHASE TWO will have reached the \$15.25 million mark.

Dr. Charles C. Ellis '40, chairman of the Board of Trustees, noted that there were many factors that contributed to the success of PHASE TWO. "The campaign leaders did an outstanding job for Juniata," Ellis said. "Through their efforts, we were able to secure several major gifts and challenge grants that served as catalysts for our fund-raising efforts."

The largest single gift in PHASE TWO came in March, 1985 when the Westvaco Corporation donated

its Williamsburg conference center and 70 acres of property to the college. Valued at \$1.1 million, the gift included the main structure, a beautiful colonial style mansion, as well as two other residential structures. Also on the property is a natural spring which produces some eight million gallons of water daily.

The facility, now known as the Juniata College Conference Center at Williamsburg, is being used for a variety of educational seminars, meetings and workshops. "This gift underscores the strong relationship between Westvaco and Juniata, and is an excellent example of private sector involvement in fostering educational excellence," Ellis said.

In addition to the conference center, two major challenge grants played a key role in the success of PHASE TWO.

A \$250,000 one-for-one matching grant from the Pew Memorial Trust of Philadelphia for academic computer applications was successfully completed in the spring of 1985. Commitments from corporations, foundations, alumni, friends and a special appeal to the campus community and parents of Juniata students made this part of PHASE TWO successful. Through the challenge grant, the college secured \$500,000 of the \$1 million needed for the academic and administrative computer systems.

(continued on next page)

Dr. Charles C. Ellis '40, chairman of the Board of Trustees, addresses those gathered for the press conference which launched PHASE TWO in October, 1984. Dr. Frederick M. Binder (left) and Dr. Joseph R. Good '33 (right), general chairman of PHASE TWO, look on.

The \$150,000 one-for-two challenge grant from the Whitaker Foundation of Camp Hill successfully secured \$450,000 for new scientific equipment and instruments for the college. Several major grants, including \$67,000 from the state and \$50,000 from the National Science Foundation, along with individual and corporate contributions, were important factors in successfully meeting the Whitaker challenge.

Endowment for academic purposes and scholarship assistance also was a major goal of PHASE TWO. With about 80 percent of Juniata's students receiving some form of assistance, establishing new scholarships has been important. As a result of PHASE TWO, several new scholarships have been established by individuals and businesses and existing scholarships have been enhanced. In addition, funds have been received to support faculty internships and visiting executive programs.

"Leadership has been a key to the success of PHASE TWO," Ellis said, "Without the hard work of General

Chairman Joseph R. Good '33 and Honorary Chairman Vincent A. Sarni, PHASE TWO would not have been this successful. These two individuals, as well as the other committee chairpersons and leaders, spent a great deal of time and energy working toward the successful conclusion of PHASE TWO. They deserve our thanks for a job well done," Ellis said.

Ellis singled out Dr. Frederick M.

Binder for special praise. "As president of Juniata for 11 years, Dr. Binder provided outstanding leadership and direction for the institution. In addition, he was one of our most outstanding fund-raisers, spending a great deal of time meeting with potential contributors. The success of PHASE TWO is a tribute to Dr. Binder's dedication and hard work."

Of the \$4.8 million raised in PHASE TWO, more than \$1 million came from Juniata alumni. "Juniata is fortunate to have an extremely loyal alumni population," noted Dr. Clayton N. Pheasant '65, vice president for college advancement. "Each year, more than 40 percent of our alumni donate funds to the college. That figure is nearly double the national average."

Included in that \$1 million are funds raised for the Annual Support Fund (ASF) which has met its \$275,000 goal for two successive years. David Beachley '77, chairman of this year's ASF, has carefully supervised the progress of the ASF all year. "I'm very impressed with the loyalty of Juniata's alumni, and I thank everyone who helped us reach this year's goal."

With the successful completion of PHASE TWO, the college is in an excellent position to conclude the Century II Campaign by the target date of 1990, Pheasant pointed out.

(continued on next page)

The new Juniata College Conference Center at Williamsburg, donated by the Westvaco Corporation and valued at \$1.1 million, was the largest single gift received during PHASE TWO.

Andy Murray, campus minister, talks with the media following his 20-mile "Swim for Peace" on Raystown Lake last September. The swim was designed to raise funds for the proposed Peace Studies Institute.

"We have less than \$5 million to raise in order to bring this 10-year effort to a close," Pheasant said.

"Raising that much money is never easy, but with the continued support of alumni, foundations,

businesses and corporations and other friends, Juniata will reach its goal of 'enhanced excellence.' " □

Auditorium Renovations Proceeding

As the center for cultural activities on the Juniata campus, Oller Auditorium is one of the college's most "public" buildings. From theatre productions, lectures and Artist Series performances to Convocations and "All Class Night," thousands of people enter the building each year.

Built in 1940, Oller Auditorium has been undergoing some renovations in recent years, and the long-term project is approaching the final stages, according to William R. Alexander '66, vice president for financial affairs.

Although the work in Oller Auditorium began in 1978, the "visible" projects have been taking place in the last two years. During the summer of 1985, a new roof was put on the building and the auditorium seats were reupholstered. This summer, the ceiling tiles are being repaired, the interior will be repainted, stage and window curtains will be replaced and plans also call for cleaning or replacing the carpet.

Some of the less visible, but equally important work that has taken place includes the complete restoration of the Moller organ in 1981-82. The instrument was completely dismantled, taken to the M.P. Moller Company factory in Hagerstown, Md., and refurbished to its original splendor.

Thanks to a \$65,000 grant from the Pew Memorial Trust, a new heating and ventilation system has been installed in the building. In addition, a new lighting control

Oller Auditorium, the center of cultural activities on campus, has been undergoing a long renovation program that is expected to be completed soon.

system has been made possible by a \$25,000 grant from the Pitcairn-Crabbe Foundation. A gift from the Allensville Planning Mill helped install a new stage floor.

"Oller Auditorium has been a major part of Juniata for more than

four decades," Alexander noted. "By the time this face-lift is completed, we will have spent nearly \$325,000 over a 10 year period. I think we will all be proud of the final results." □

Business Center Funded

A new Business Outreach Center designed to provide management consulting services for area businesses, has been established at Juniata College thanks to grants from the Mellon Bank Foundation and Mellon Bank (Central).

With these two \$5,000 grants, the Business Outreach Center, run by the college's economics and business

administration department, is available to help small manufacturing firms in Huntingdon, Mifflin, Blair, Centre and Bedford counties. Staffed by department faculty, the Center offers such services as business plan preparation, financial planning, commercial loan application

(continued on next page)

preparation, market research, product analysis, production and inventory control, personnel policies and procedures and information system development and analysis.

In order to relieve the reluctance businesspersons may have in seeking assistance from college faculty, several successful strategies will be utilized. First, the consultants work within deadlines and demonstrate tangible results in a timely fashion. In addition, the Center has developed an approach which suggests to the firm that the consultant is a partner in the enterprise and genuinely concerned with the success or failure of the venture. Finally, the college consultants will not hesitate to suggest particular tasks which the Center might do for the client, rather than wait for the firm to initiate requests.

The Business Outreach Center, which is seeking additional funding from the Ben Franklin Partnership program, is an outgrowth of a program established by the economics and business administration department last year. In 1985, under contract with the Southern Alleghenies Regional Planning Commission, the department provided 712 hours of consulting services to firms located in, or considering locating in the Southern Alleghenies Enterprise Center in Huntingdon.

Dr. Clayton N. Pheasant '65, vice president for college advancement said, "These two grants will help us establish a program that benefits both the faculty and area businesses, and will help strengthen the bond between the college and the community." □

Three New Scholarships Established

Three new scholarships designed to aid Juniata students have been established in recent months.

The Charles A. Frueauff Foundation of New York has awarded the college a \$15,000 grant to establish an endowed fund for scholarship support, one of the main goals of PHASE TWO of the Century II Campaign.

The Frueauff Foundation has supported Juniata with a variety of grants dating back to December 1971. These grants have helped fund construction of the Humanities Center, the Kennedy Sports + Recreation Center and support the recent computerization program.

Upon retiring from the Hughes Aircraft Company in California, J. Ward Putt '45 has established an endowment to provide scholarships for students studying the natural sciences. Putt, a chemistry major at Juniata, remembers with fondness the practical lessons he learned from Professor N.J. Brumbaugh.

A new music scholarship has been established by the Huntingdon Music Club, a cultural force in the community from 1928-67 that brought many important performers to Huntingdon and sent promising young musicians to summer programs.

A five member committee comprised of Miriam Steel, Betty Swan, Eleanor Banks, Virginia Strait and Mary Ruth Linton '38, voted to establish the music scholarship with the proceeds from the recent sale of the club's Steinway grand piano. □

Alumnus Donates Funds for New Observatory

For many years, Juniata College's telescopes have been housed in a variety of locations in the Brumbaugh Science Center. Because of inconvenience and the difficulties with climatic conditions, the telescopes have not been used to full potential by students and are seldom available for community use.

All this will change soon thanks to Paul E. Hickes '42 of Alexandria, Pa., who has donated funds to build an observatory on Roundtop behind the science center.

The new brick structure, approximately four meters in diameter, will feature a rotating dome which opens to allow viewing in any direction. The project, which will cost an estimated \$20,000, should be completed this fall.

Currently, the telescopes must be wheeled outside when they are to be used. This has caused a variety of problems due to their size and the sudden changes in climate.

The new observatory will allow the instruments and the viewers to be protected from the elements. It also will enhance the college's excellent science program and allow the college to conduct public viewing sessions periodically.

Dr. Norman E. Siems, associate professor of physics, notes that astronomy is one of the sciences which continues to hold the public's fascination. "With this new observatory, we would encourage visits from scout groups, science clubs and other organizations."

Juniata currently has three telescopes, including a five-inch refracting Brashear telescope acquired by the college from John Brashear in 1908. Brashear was one of the most prominent telescope makers in the early 20th century.

Thoughts about an observatory date back to the acquisition of the Brashear instrument. The 1911 *College Bulletin* stated, "Astronomy is

illustrated by means of a five inch telescope made by John A. Brashear of Allegheny, Pennsylvania. The telescope is not permanently mounted and it's hoped that some friend will provide better facilities for use of the telescope in a permanent observatory."

The new Paul E. Hickes Observatory will turn that hope into a reality in 1986. □

(J. Omar Good continued)

Dr. John C. Trever

degrees from Yale University and is an ordained elder in the Methodist Church.

Dr. Trever started the Dead Sea Scrolls Project in 1971 while on the faculty of Baldwin-Wallace College where he was a professor of religion for 16 years. He came to the School of Theology at Claremont in 1975.

In 1947-48, while on leave from the faculty of Drake University where he taught for three years, Dr. Trever played an important role in the discovery of the Dead Sea Scrolls as a fellow of the American School of Oriental Research in Jerusalem. The story of his relationship to this discovery is recounted in his book, *The Untold Story of Qumran*.

Dr. Trever was named executive director of the Department of English Bible of the International Council of Religious Education in 1948. Two years later, it became the Division of Education of the National Council of the Churches of Christ in the United States.

Between 1948 and 1980, Dr. Trever made numerous trips to the Middle East, studying the flora of the Bible, ancient Hebrew manuscripts and interviewing the Bedouins who discovered the first Dead Sea Scrolls.

In addition to three books, Dr. Trever has published many articles

in professional and religious journals including *The Interpreter's Dictionary of the Bible*. He also has lectured extensively.

As the J. Omar Good Professor, Dr. Trever will be teaching courses at Juniata for the 1986-87 academic year, and will participate in seminars, discussions and lectures on and off campus.

The J. Omar Good Visiting Distinguished Professorship in Evangelical Christianity was

established in 1975 with a bequest from the late J. Omar Good, an 1896 Juniata graduate who left the college \$1 million.

Pauline and the late Lester Rosenberger of Narberth, trustees of Mr. Good's estate, decided that his final wish for "the perpetuation of the Historical Triune Faith of Protestant Christianity," could best be carried out by establishing a professorial chair at Juniata. □

International Alumni Group Holds Meeting in Amsterdam

Amsterdam, an international city rich with history, hosted the second annual Juniata International Alumni Association (J.I.A.A.) reunion April 11-13.

Forty-two alumni came by plane, train, boat, bus and car to spend a weekend together remembering years at Juniata, making new friends and enjoying the beautiful city of Amsterdam.

For the first time, two people from North America joined the reunion. Rick Phalunas '73 "dropped by" from a business trip in London. Rick subsequently has been named Juniata's new dean of enrollment. Also attending was Margaret R. Ginglewski '88 who will be studying abroad this year.

After settling into the Youth Hostel Voldelpark, the group met at Restaurant Haesje Claesz to kick off the weekend with a delicious Dutch meal. The evening was spent catching up on old friends and welcoming new ones. Though most were still students, many will be finishing their studies soon. Others are embarking on exciting careers in business, government and education. Many plan to return to the States to visit, study or work.

Activities for the weekend included a two-hour canal tour of Amsterdam and visits to other spots

such as the Vincent Van Gogh Museum, the Anne Frank House, and the delightful cobblestone streets and cafes.

Saturday evening, the group convened once more for dinner at the Restaurant Peking. Dr. William C. Vocke, director of international programs, led the J.I.A.A. meeting. He thanked this year's officers for all of their help, as well as all those who lent a hand in making the reunion possible. Special thanks were extended to Estelle Decherf. After covering the necessary business of the meeting, Vocke gave a brief overview of changes at Juniata. The administrative changes, a new curriculum and increased language instruction were among the topics discussed.

In September and October, J.I.A.A. members will be able to participate in local reunions in Marburg, Lille, Hull and Muenster designed to welcome Juniata juniors studying aboard. There will also be meetings in those cities in November in conjunction with a visit by Juniata faculty or staff.

Next year, Paris will set the stage for the third annual international alumni reunion April 10-12. Once again, the Alumni Office will be offering a no-frills package for

(continued on next page)

people in the U.S. who would like to go along. Also, anyone who has studied abroad or is interested in international affairs is welcome to

join J.I.A.A. Membership dues are \$3, which is used primarily for postage costs. Those who participate in the reunion are automatically

members; dues are counted as part of the weekend cost. □

Faculty and Staff

JAY D. BUCHANAN, campus counselor and assistant professor of psychology, presented a paper at the annual meeting of the Pennsylvania College Personnel Association in Lancaster. Entitled "Self-Destructive Behavior and the College Student," the presentation examined depression and suicide on college campuses, with particular emphasis on counseling strategies and instructional responsibilities.

WILLIAM B. MARTIN '59, director of career planning and placement, has been elected president of the Pennsylvania Association for Career Services. The election took place at the group's annual conference held in Williamsport May 13-14. The organization represents career planning and placement personnel of all four-year degree granting institutions in the Commonwealth.

Nine staff members were honored for 10 years of service to the college at this year's Founders Day Tea held April 17. Those recognized at the gathering, which was attended by college employees with 10 or more years of service, were: JANE H. BROWN, college nurse; LINDA SUE ESCH '68, professor of mathematics; TOM L. FISHER, associate professor of chemistry; TODD D. GUSTAFSON, associate professor of biology; DAVID L. HARKER, security officer; PATRICIA M. KANN, economics and business administration department secretary; ANTHONY J. NABOZNY, athletic equipment manager; RUTH E. REED, associate professor of chemistry; and MARJORIE L. RUTHERFORD, admission office secretary.

PAUL M. HEBERLING, associate professor of anthropology, participated in a course in forensic anthropology (the interpretation of life forms from skeletal remains) at Christian Brothers College in Memphis. The course was sponsored by the American Academy for the Advancement of Science.

LAWRENCE R. BOCK, director of financial aid and head volleyball coach, has been appointed chairman of the Eastern Regional Advisory Committee and selected as a member of the NCAA Volleyball Committee. Both appointments were made by the National Collegiate Athletic Association (NCAA).

JAMES R. DONALDSON '67, associate professor of economics and business administration, has been elected to the Advisory Council of the Keystone Region, United States Volleyball Association. He will serve a one-year term as chairman of publicity and marketing. Donaldson is advisor to the men's volleyball club at Juniata.

In May, FREDERICK M. BINDER received two honors from his alma mater, Ursinus College. At the college's commencement ceremony, Dr. Binder delivered "Remarks to the College Community" and was presented with a Certificate of Honor in recognition of his "leadership in higher education and dedication to liberal learning." Later that month, the Ursinus Alumni Association presented Dr. Binder with its Annual Alumni Award.

JOSE C. NIETO, Mary S. Geiger Professor of History and professor of religion, was invited to the Pittsburgh Theological Seminary this spring to present two lectures and address two classes.

This spring was a busy one for ANDY MURRAY, campus minister and TERRY MURRAY, instructional assistant in music. The two were at Bethany Theological Seminary in March where Terry gave an organ recital and Andy delivered a lecture on "Theology Peace and the Problem of Optimism." They also gave a joint concert.

Also in March, Terry gave an organ recital at the Indian Creek Church of the Brethren and Andy presented two workshops at the University of Nebraska on the development of Peace and Conflict Studies. In April, the Murrays gave concerts at the Drexel Hill Church of the Brethren and Indiana University of Pennsylvania where Andy also lectured on peace studies. Later that month, Andy was the main speaker at the Regional Youth Meeting at Bridgewater College which was attended by some 600 high school students.

Students

Elections were held this spring for new class officers for the 1986-87 academic year. Members of the senior class elected WILLIAM R. HINCHMAN of Audubon as president, STEPHEN G. MEEKER of Lansdale as vice president, MARGARET J. PETERSON of Slippery Rock as secretary and LISA L. LEININGER of Selinsgrove as treasurer.

The new junior class officers are

AMY L. WERTZ of Malvern, president; CHRISTINE KLEINFELDER of Bristol, vice president; KRISTINE A. NICKLAS of Warren, secretary; and JOSEPH J. NEWHART of West Pittston, treasurer.

The sophomore class elected REBECCA J. ABRAHAM of York as president, AMY L. COURSEN of St. Louis, Mo. as vice president, JILL M. CROUSE of Newberg as secretary and JEFFREY R. BUEHLER of Warminster as treasurer.

New officers also were elected for the Student Government. They are DANIELLE M. RUPP '87 of Red Lion, president; REBECCA HOSTETTER '88 of Hershey, vice president; CAROLYN L. STAMBAUGH '88 of Thomasville, treasurer; and AMANDA S. SMITH '88 of Alexandria, secretary.

Fifty-eight students received academic and athletic awards at this year's spring Awards Convocation. Among the top academic awards are the Charles C. Ellis Scholarships and the Christian R. and Mary F. Lindback Foundation Scholarships. The Ellis scholarship recipients were DANIELLE M. RUPP '87 of Red Lion, MARTHA E. KUDER '87 of Churchville, ROBERT T. GREENLEE '87 of Johnstown and DAVID E. KUNKLE '87 of Marysville. The Lindback scholarships went to DANIELLE M. RUPP and JILL M. WINEKA '87 of York.

GINO V. PERRI '86 of McKees Rocks was the recipient of this year's Stanford Mickle Athletic Award as the outstanding senior male athlete. Perri was a member of the football and track teams. The John E. Blood Memorial Award, presented to the senior athlete who has earned at least four varsity letters and has the highest grade point average, went to JOSEPH M. SCIALABBA '86 of Huntingdon. He was a member of the golf team. Juniata's outstanding woman athlete, recipient of the Charles

Bargerstock Award, was JANET L. ROBISON '86 of Duncansville, a member of the basketball and softball teams.

LAUREN M. ROGERSON '86 of New Kensington and GINO V. PERRI '86 of McKees Rocks were selected as this year's *Woman of the Year* and *Man of the Year* at the annual May Day breakfast. In all, 18 students were honored.

The eight students selected *Juniata Women for 1986* were VIRGINIA A. KRALL '86 of Ephrata, KATHERINE M. POPPENBERG '86 of Sewickley, DANIELLE M. RUPP '87 of Red Lion, JILL M. WINEKA '87 of York, LISA A. BAER '88 of Doylestown, AMY L. WERTZ '88 of Malvern, AMY L. COURSEN '89 of St. Louis, Mo., and MARIA P. TWEARDY '89 of Abbottstown.

The other eight *Juniata Men for 1986*, all members of the class of '86, are: TIMOTHY A. BARNETT of Goldsboro, N.C., GREGORY S. MOLCHANOV of Johnstown, JOSEPH M. SCIALABBA of Huntingdon, MATT G. SIEGEL of Bullville, N.Y., THOMAS A. TRENT of Somerset, GARY T. WARNECKER of Lilburn, Ga., MICHAEL H. WOJCIK of Central City and ROBERT A. YANCKELLO of Sewickley.

Visitors

The 1985-86 World Affairs Lecture Series concluded with presentations on nuclear weapons and U.S. relations with Japan.

In April, REAR ADM. EUGENE J. CARROLL, JR. USN (Ret.) came to campus to discuss the Soviet Union's proposed moratorium on the testing of nuclear weapons. Carroll, who now serves as deputy director of the Center for Defense Information in Washington, D.C., has been very active in the negotiations which encouraged the Soviet Union to announce the moratorium.

DR. ARDATH W. BURKS, professor of history, emeritus at Rutgers University, delivered the May lecture on U.S./Japanese relations. Dr. Burks is the author of a book on Japan.

The J. Omar Good Lecture Series concluded April 17 with a talk by DR. DONALD F. DURNBAUGH, professor of church history at Bethany Theological Seminary. His topic was "The Brethren and Higher Education: Tension and Transition."

Cary Simpson '49, owner of the Allegheny Mountain Network, talks with Juniata students about careers in broadcasting during this year's Career Fair held in April. Many alumni participated in the event sponsored by the Career Planning and Placement Office.

SPORTS

Perri Captures Titles

Spring Teams Have Mixed Season

The spring sports picture on College Hill was mixed with excitement and disappointment.

Bright spots consisted of an outstanding season by the women's softball team, heated competition on the golf course and individual track success by Gino Perri '86.

Softball

The diamond girls recorded a 13-6 mark on their way to the winningest season in their six year history.

Janet Robison '86 earned All-American second team honors for her outstanding offensive performance. Robison collected 26 hits in 60 at-bats, averaging .433. She was the team leader in hits (26), runs scored (27) and homeruns (5).

Pitching ace, Kathy Bednarczyk '87 chalked up a 13-3 record on the mound. Five shut outs, a 0.74 ERA and a no hitter against St. Francis College were among Bednarczyk's laurels this season.

Baseball

The Tribe had an "elevator" season this spring. They had some "up" days and some "down" days on their way to an 11-16 mark.

On any given day, the Indians were overpowering and trounced teams like Elizabethtown 15-3. On other days, the blue and gold team suffered from numerous errors which resulted in losses to teams like Messiah (14-4).

Despite the inconsistency of play this spring, three starters earned Middle Atlantic Conference All-Star honors for their individual performances. Sophomore Dan Webb had a .432 batting average in the designated hitter's spot. Junior

Mike Culver went 36 for 93 at the plate to average .387. The outfielder is also an All-Conference performer for the grid team. Senior Rich Howey, a steady on the mound for Juniata, earned All-Conference honors for the second consecutive year. Howey compiled a 5-1 record and a 2.33 ERA.

Men's Track

The highlight of the spring was the superb performance by senior Gino Perri at the Middle Atlantic Conference Track and Field Championship.

Perri captured two M.A.C. championships this year, including a record in the discus event. He hurled the discus 155 feet, 4 inches to beat the old mark of 153 feet, 8 inches set by Tom Mullane of Muhlenberg in 1985. Perri took his third straight shot put title with an effort of 15.12 meters or nearly 50 feet.

Perri made his third appearance at the NCAA Division III Track and Field Championships on the campus of the University of Wisconsin, LaCrosse May 21-24. He finished ninth in the discus event and 15th in the shot put. A versatile athlete, he was an All-American in the javelin event in 1984. Perri earned Pizza Hut All-American honors in football in 1984 and 1985.

Teammate Rob Yanckello '86 finished second in the shot put at the M.A.C. championships. Doug Spayd, a junior on the Indians' squad, captured a pair of fourths in the finals. He ran a 15.2 in the high hurdles and a 56.9 in the 400 intermediate hurdles. Sam Bonardi '89 hurled the javelin 50.51 meters

Gino Perri '86 earned two Middle Atlantic Conference Championships and a trip to the NCAA Division III Track and Field Championships in the shot put and discus events this spring.

on his final attempt to take fifth place.

The striders finished their regular season with a 3-9 mark.

Women's Track

Five lady Indians participated in 12 events at the Middle Atlantic Conference Championships this spring.

Susan Gill '87 reached the finals of the 400 but didn't place in the event. Kris Smith '88 was seventh in her heat of the 1500 run, but her time wasn't fast enough to qualify for the finals. The Tribe's 1600 relay team of Smith, Gill, Krista Jones '88 and Lisa Baer '88 finished seventh.

Amy Hoch '89, the final Indian competitor, tossed the discus 93-0, but did not qualify for the finals.

The golden runners finished 1986 with a 2-7 overall mark.

Men's Tennis

The netters recorded a 5-4 mark this spring on the court.

Standout, Danny Corazzi '88, playing in the number one spot, entered the Middle Atlantic Conference tournament with a 6-3 record. He defeated Lycoming's Bruce Mooney 6-1, 6-0 before falling to Mike Poss of Dickinson in round two. Juniata's Chris Savage, was eliminated in the first round.

The Indian doubles team of Dan Berger '87 and Rich Gottschall '89 lost their M.A.C. match to a tough doubles opponent from King's College.

Women's Tennis

Juniata's most valuable player, Leanne Egolf '86, collected five victories in seven outings to earn a bid to the Middle Atlantic Conference championships. Egolf trounced Gina Bruno of Lycoming 6-0, 6-0 before bowing to Michele Marangi of Muhlenberg in the tournament.

Laura Beck '88 and Lynda Cass '89, the Indians doubles combo, dropped their first round match 2-6, 3-6 to Lycoming's top doubles team.

The Tribe finished their season with a 4-6 record.

Golf

The links were good to Juniata golfers this spring.

The Indians collected a 5-2 dual match record and an eighth place finish in the Middle Atlantic Conference tournament April 25-27.

After Saturday's opening 27 holes, the Indians were 14th in the 21-team event. However, senior Tom Cancelmo's 116 score for 27 holes on Sunday was one of the top rounds of the day. Cancelmo and Steve Borza '86 finished with a 252 for the tournament. Junior Jim Armstrong shot a 256 for the Tribe, while senior Joe Scialabba's 263 rounded out the four-man scoring that moved Juniata into the number eight spot. □

Juniata's Carol Tendall '86 (left) and Shelly Stepke '88 (right) paced the Indians during a spring track meet against Lebanon Valley.

Bock Predicts Exciting Volleyball Season Ahead

By Tracey L. DeBlase '85

Larry Bock is the financial aid director at Juniata College. Every day he answers questions for alumni, students, faculty and parents about loans, grants and other numerical data. However, those aren't the only number questions he answers on a daily basis.

Bock is also the women's volleyball coach, entering his 10th season. As the team's success continues, so do inquiries about the upcoming season. Volleyball fans want to know how many starters return . . . what can be expected for the upcoming season . . . who's favored in the conference . . . the region . . . the nation . . . when should reservations be made for Nationals? For some fans, a quick scan through *The NCAA News* may provide a pre-season poll. It's a guarantee that Juniata will be there, but for the avid volleyball fans that

want *all* the answers, Larry Bock is the best bet.

Behind a desk, computer and financial aid records, Coach Bock recently took "time out" to discuss the 1986 volleyball season, which may be one of the most intense ever witnessed on College Hill.

Every starter returns from last year's 40-8 season. The Indians, who finished third in the NCAA Division III tournament, will have experience in every position. "I feel certain that this will be a very confident team going into the season. Hopefully we can maintain that confidence throughout the season," said Bock.

The middle will be dominated by senior Carolyn Stambaugh and junior Cathy Miller. Stambaugh collected 303 kills in 1985 and led the hitters in kill ratio (28%) and stuff blocks with 120. Miller followed Stambaugh with 118 stuff

(continued on next page)

blocks and 294 kills. Mariella Gacka '87 and Jackie Rebert '89 return to the outside hitter spot along with Diana Hauger '87. Gacka, a 1985 All-Conference selection, is the team leader on defense with a .880 digging average and .480 passing accuracy ratio. Rebert, an explosive hitter returns to the line-up with 255 kills to her credit in her freshman season. Hauger returns as a spot starter for the Indians.

Captain Lori Bason '87, a 1985 Academic All-American, returns along with Jodi Cox '88, the team's leader in kills with 315. All-American Beth Hoppel, a junior setter, will "quarterback" the spiker's complicated offense.

Bock expects sophomores Heather Pruim and Dana Worthington also to be "dominant forces." Worthington as a defensive specialist, and Pruim as a hitter, should aid the Indians' cause.

The team's success in the past has enabled Bock to continue to recruit top notch players. This year will be no different. "We feel we're getting several very good recruits," said Bock. Rhonda Bygall of York County, Laurie Snow of Altoona and Kris Witchey of Grand Junction, Colo. join the golden spikers along with several other talented freshmen.

Diversifying the offense and establishing defensive priorities for individuals will be part of the 1986 game plan according to Bock.

The challenge begins when the hitters open their season in September. "Our schedule is a difficult one, especially early on. If we can avoid making a difficult schedule into a negative experience it should help each individual and the team grow," he said.

The Indian Hitters will be challenged every time they step onto the court this fall, particularly at the Penn State University Invitational, the Occidental-Tachikara Invitational in Los Angeles, and at Elmhurst College in Illinois. The Juniata Classic will continue to rank among the top volleyball tournaments in the

country.

The golden spikers will strive to do well in the Middle Atlantic Conference and earn a bid to the NCAA Division III Tournament. "Doing well in the MAC tournament is always important to us. But, I'm sure that the NCAA tournament will be in the back of everybody's mind. Potentially, we should be a big factor in it as long as we take every practice and match one at a time," Bock said.

Susan Benusa '81 is entering her

second year as assistant coach. Bock said, "my assistant coach is one of the best in the country. Susan and I and all of the players just can't wait to get into this season."

For now, Coach Bock will continue to answer loan, grant and numerical data questions in the financial aid office. But in a few short weeks, the Juniata volleyball team will be answering on the court and Indian fans should like what they see. □

Olympic sporting events are depicted in a new mural hanging in the Malloy Lobby of the Kennedy Sports + Recreation Center. Mrs. Susan Malloy (pictured), wife of Trustee Edwin A. Malloy, played an important role in obtaining the mural for the college.

Gridders Eye '86 Season

Expectations are high this summer as the Indian gridders near another football season. Head Coach Rob Ash enters 1986 with an optimistic outlook about his seasoned veteran squad.

Seventeen starters return from the Indians' impressive 8-3 season, including starters at all the skill positions. "Offensively we should be strong this year. We have starters returning to virtually every position on offense," said Ash.

Mike Culver '87, one of the nation's top returning Division III quarterbacks, will be calling the signals for the Tribe when they open their season at Lebanon Valley Sept. 6. "Mike is a great game player. He's very versatile. He can run, throw and read the defense extremely well," Ash said.

In 1985, Culver collected 347 yards on the ground and carried the ball over the goal line six times. He completed 121 passes for 1,741 yards and a record 17 touchdowns. He holds virtually every passing record in the Indians' history book.

Behind Culver is very capable back-up "Cubby" Davis. The sophomore from Hollidaysburg has been deemed by Coach Ash as "the best back-up quarterback in the Middle Atlantic Conference." Davis completed 14 of 22 passes for 179 yards and one touchdown during his freshman season.

Unlike last year, Culver will have several familiar faces to use as targets this season. "We have a strong, experienced receiving corps that consists of Mike Cottle '88, Jim Metz '89, Morgan Johns '87, Frank Phelps '88 and Don Betar '89," Ash said.

Cottle, the Indians' premier receiver, grabbed 52 catches for 771

Head Coach Rob Ash (left) takes time out from his pre-season planning to pose with this year's football tri-captains (left to right) Mike Culver, Bob Crossey and Bryan Warren. All three are senior veterans.

yards. He collected a record 14 touchdowns in 1985. The second leading pass catcher on the squad is Metz with 17. In 1985, he averaged 16.9 yards a catch. Phelps and Johns had 15 grabs each. Phelps collected 365 yards including a 94 yard touchdown reception. Johns averaged 12.6 yards per catch and a total of 187 yards.

Perhaps Ash's biggest task on offense will be to find replacements for offensive linemen Mike Kaufold '86 and Rob Yancello '86. "I think the key to our success on offense will be to rebuild the line," Ash said. Steve Yerger '87 and Bob Albright '87 combine to make the "best tackle combo in the Middle Atlantic Conference," according to Ash. Bill Snyder '87, a second year starter on the offensive line, may be looking at All-Conference honors.

Ash expects Ty Snavely '87, Mike Martin '89, Jeff Witkoski '89, Randi Barra '89 and Doug Durham '87 to supply stability on the line. The Indians' offensive attack could depend on how well the linemen open holes for the backs and protect Culver in the pocket.

The Indians' running attack will be led by Gregg Townsend '89, Ian Malee '87, Pat Danneker '89 and Rick Bouch '89. Townsend, the Indians' leading rusher in 1985, was sidelined late in the season with a knee injury. Before the injury, he rushed for 523 yards on 103 attempts for a 5.1 average. "Gregg is a great player. At this point he seems to be 100 percent," Ash said.

Junior Rick Bouch, who averaged 4.2 yards per carry, replaced Townsend after the knee injury and became the "unsung hero" in the last two victories over Susquehanna and Upsala, according to Ash.

Joining Townsend or Bouch in the backfield will be fullback Ian Malee, who carried the ball 112 times for 461 yards. He scored four times and averaged 4.1 yards per carry. Ash will look to sophomore Pat Danneker for depth at that position. Danneker averaged 3.2 yards per carry in 1985.

On the other side of the line, defensive coordinator Brad Small will be looking to fill the position dominated by Pizza Hut All-

(continued on next page)

American Gino Perri and All-Conference standout Steve Haley who have both graduated. Leading contenders for these spots are Ray Witmer '88, Jeff Haines '89, Russell Tschopp '89 and Ed Yencha '89. "These guys are all very capable of getting the job done," said Ash.

A highlight on the defensive line will be the return of Lou Komer '87 and Tom Kalinyak '87. Komer and Kalinyak have been credited by Ash as "one of the best pairs of defensive ends in the conference." Komer and Kalinyak were instrumental in Juniata's 17-15 victory over Widener University.

Tom Yeager '88, another outstanding defensive lineman, returns in 1986 with two touchdowns to his credit. Yeager had a keen instinct to find the ball and successfully recover fumbles and intercept passes last year. On two occasions he turned those turnovers into scores for Juniata.

In 1985, the Indians were one of the nation's top Division III defensive units. Much of their

success stemmed from the aggressive hitting of the linebackers.

The "crack pack" consists of Bob Crossey '87, a GTE Academic All-American, and Bryan Warren '87, two superb linebackers from Penn Hills High School. "We have Crossey and Warren who combined for more than 200 tackles last season and Frank Gay '89, Jeff Danyus '88, Joe Yalch '89 and Brent Bittner '89 who are all very capable back-ups," Ash said.

Behind the "crack pack" will be a very experienced secondary that may have opposing quarterbacks nervous in the pocket and receivers frustrated down the field.

One of Ash's top priorities in the pre-season will be to find a replacement for Rich Howey '86. Howey, the Indians' free safety, completed four years of football excellence. Ash feels that the top candidate for Howey's spot is cornerback Mark Dorner '88. "We may move Dorner into that slot and Tim Kirsch into the cornerback position. Greg St. Clair '88 and

Clayton Carlin '87 return with two years experience and Mike Grill '89 and Bryan Worner '89 will also help out," Ash said.

The defensive unit snagged 33 passes from opposing quarterbacks in 1985. Ash feels that it will be tough to repeat that performance but notes that it's not impossible.

Another high priority for the grididers will be the specialty game. All Conference kicker Mike Schaffner '86 and punter Paul Kutches '86 have graduated. "Those positions are up for grabs. It's safe to say that the performance of these new people will help decide the outcome of our season," Ash said.

Undoubtedly the Indians will be ready when their season opens in September. The Tribe reports to camp on Aug. 16. They will face a traditionally tough schedule this year. "Our goal is to do well in the early part of the season. When we get to Lycoming (defending MAC champions) we hope to be playing a game that may well determine the conference champion," Ash said.

CLASS NOTES

28

Hubert Snyder and his wife Marjorie, have recently moved to 800 Southerly Rd., Baltimore, Md. Any Juniatians visiting the Baltimore area are welcome to stop in or give them a call.

29

Ruth W. Prentice reports that she is enjoying her retirement in Worcester, Mass. She would love to come and see the changes to the Juniata campus.

Arthur L. Rairigh and his wife, Mildred, recently celebrated their 45th wedding

anniversary. They reside in Asheville, N.C. Mr. Rairigh enjoys golfing at least two days a week.

31

William F. Phennicie, Meyersdale, Pa., retired after 40 years of service in the school systems as high school principal and teacher in Meyersdale. He is an ordained minister, currently pastor of Garrett Church of the Brethren.

33

Charles C. Wright, Greensburg, Pa., retired after 30 years with the Westinghouse Electric Corp.

41

Stephen L. Willard, Spartanburg, S.C., is enjoying his retirement. He enjoys watercolor paintings and was recently commissioned to do two paintings for City Hall.

Kishacoquillas Alumni Club

Luella Treuhaft '40 was the emcee for the Kishacoquillas Club meeting April 18 at Zimmie's Restaurant. The 38 people present enjoyed visiting, singing and hearing from Dr. Earl Kaylor, Jr. '46, professor of history, who discussed the visions of M.G. Brumbaugh and how those visions are being fulfilled today.

47

Ross A. Bierly of Baltimore Md., retired from the State Department of Education in Maryland on January 1, 1986. His work involved vocational rehabilitation.

48

John M. Carper and Jane (Reidenbaugh) Carper moved to Silver Spring, Md., in November of 1985. John is working in the Pediatric Clinic at Walter Reed Army Hospital in Washington, D.C.

Linda (Price) Gilbaugh of Warner Robins, Ga., is enjoying traveling with her husband, Wallace. They are actively involved with church and social activities and she would love to receive letters from her classmates.

Lucy (Horton) Matteson of Tacoma, Wash., is currently working as a registered dietitian with the Northwest Diabetes and Metabolism Center in Tacoma. Her work includes nutrition, instruction in diabetes and food habit management for weight reduction.

James K. Palmer and Elizabeth (Leach) Palmer are residing in Hiwassee, Va. They recently spent three months in Brazil. Dr. Palmer taught at the University of Sao Paulo and lectured as a Fulbright scholar.

50

Robert A. Dingeldein, of Bellwood, Pa., retired from a management training position with the Commonwealth of Pa., on June 20, 1985.

53

Samuel S. Byers, University Heights, Ohio, spent two weeks in March performing oral

surgery in Honduras under the auspices of the Christian Medical Society (Medical Group Missions).

56

Jane (Ellenberger) Barber and her husband are retiring to southern Alabama to take advantage of warmer winters and to be closer to their oldest son. Their new address is: Box 212k, Route 6, Andalusia, Ala. 35420.

William Z. Smith and his wife, **Leona (Davidson) Smith** live in Washington, D.C. adjacent to Rock Creek Park. William works for the FDIC and Leona answers members' correspondence for the National Geographical Society.

57

Lona (Beabes) Norris, Huntingdon, Pa., recently was named administrator for Morrisons Cove Home. She officially began her duties on February 19, 1986. Prior to her

employment at the Home, Lona was executive director of the United Cerebral Palsy Assoc. serving Huntingdon, Mifflin and Juniata counties. Lona and her husband, **Wilfred '54**, professor of physics at Juniata, are the parents of one son and two daughters.

58

Noel A. Plummer, Pittsburgh, Pa., is now teaching full-time at Slippery Rock University after 18 years of working with the state hospital system. Dr. Plummer assumed the presidency of the Pennsylvania Psychological Association in June.

60

Jay R. Maust, Burke, Va., has relocated from Hawaii to the Washington, D.C. area and is presently assigned as dental staff officer for professional affairs in the office of the Air Force Surgeon General.

61

Paul Holloway, Jr. of Exeter, N.H., recently received the National Award for Design, given for his creative design for an auto

Chicagoland Area Alumni Club

The Chicagoland Area Alumni Club met on April 12 at Bethany Theological Seminary with 29 people present. Dr. Robert Neff, president-elect of Juniata College, was in attendance with his wife, Dorothy (Rosewarne) '59. The Chicagoland Alumni Club had the distinction of being the first alumni club addressed by Juniata's president-elect.

Mary Elizabeth Wieand '35 and her daughter, Mary Farahat, provided entertainment for the group. They played a piano and flute duet. Charles Kensinger '72, director of development, also entertained the group with his magical talents as he talked about "The Magic of Juniata College."

dealership. Paul has had many exciting opportunities for travel in addition to having a variety of vocations.

David E. Schneeberg is in his 24th year of teaching mathematics at the Glen Burnie High School and is currently the head cross country coach, assistant wrestling coach and assistant track and field coach (outdoor). He resides in Pasadena, Md.

62

Paula (Kolsky) Lipsuis of Potomac, Md., has received her master's degree from George Washington University. She performed clinical testing in the Reading Center for the past three years teaching at George Washington University in the gifted program for children. She is currently a reading specialist at Lowell School in Washington, D.C. Her husband, Steve, is a psychiatrist in Washington, D.C., and they have two daughters presently in college and a 14-year-old son at home.

64

Lee H. Warner of Tallahassee, Fla., is director of the Museum of Florida History at Tallahassee.

Central Pennsylvania Alumni Club

Joan Fyock '59 planned a very special evening to enjoy Juniata friendships April 5 at the Lititz Church of the Brethren. In keeping with the reunion theme "Significant Pursuit," she used information from the most recent *Bulletin* to test our knowledge. Dr. Norman Siems, associate professor of physics and department chairman, combined Halley's Comet and Juniata College in a most interesting and informational presentation.

65

Michael M. Pearson of Cincinnati, Ohio, is currently manager of McAlpin's Department Store, an agent of Mercantile Stores, Inc.

67

Larien G. Bieber of Lancaster, Pa., recently participated in a panel discussion with three Lancaster hospital presidents. The discussion, "The Changing Role of Changing Delivery Services," took place on March 12 at the Church of the Apostles United Church of Christ in Lancaster.

66

Daniel T. Wilshire, Altoona, Pa., is working on a Ph.D. in Instructional Systems at Penn State University. He hopes to be able to finish his course work next year. He is married to **Darla (Houseman) Wilshire '67**.

Christine (Bailey) Fuller has been living in London since September as her husband, Ben, spends a sabbatical year at the University of London. Some highlights of the year have been a trip to Rome, numerous visits to the British Museum, Hadrian's Wall and other Roman remains.

Janet Kauffman of Hudson, Mich., has published a novel, *Collaborators* (Knopf, 1986). Janet received compliments in *People Magazine* (April 7, 1986 issue) concerning the book. The author of "Picks & Pans" stated that she has a "genius for indirect communication, as if truths were being shouted from around a corner." Also, one of her short stories, "The Easter We Lived in Detroit," was included in *Pushcart Prize X: Best of the Small Presses* (1985).

Darla (Houseman) Wilshire has been doing some free lance writing in addition to teaching at Altoona Area High School. She and her husband, **Daniel '66**, reside in Altoona, Pa.

68

E. James Carter, La Verne, Calif., has recently been promoted to associate professor of behavioral sciences. James is assistant dean at the University of La Verne and was recently cited for 10 years of service to the college.

Blair/Bedford Alumni Club

Springtime, blossoms and warm weather welcomed alumni to the Juniata College Conference Center at Williamsburg May 9. John Stultz '69, club president, planned a delightful evening that included dinner and musical entertainment by Kathy Reeves '87 and Andy Hendricks '86. As one alumna said, "Those who did not come missed a wonderful evening."

Michael Galloway, Finksburg, Md., is currently a partner with the law firm of Hoffman & Comfort. He has been retained as general counsel and city attorney for the city of Westminster, Md.

Dorothy (Thomas) Ginter of Northville, N.Y. is currently working with the severely mentally retarded at Lexington Day Treatment in Glens Falls, N.Y.

69

Randall T. Oeffner currently of Huntingdon, Pa., was promoted to planning manager, Textile Operation Division, at Owens-Corning Fiberglas Corporation at its headquarters in Toledo, Ohio. Randall joined Owens-Corning Fiberglas in 1974.

70

Barbara Wolfe Furjanic, Harrisburg, Pa., has been named legal assistant for the Legislative Reference Bureau, which serves the House and Senate of Pennsylvania. The office publishes the *Pennsylvania Bulletin* weekly and the *Pennsylvania Code*, a compilation of the Commonwealth's regulations.

71

Anne P. Hench of San Francisco, Calif., received her master's degree in public health from the University of California, Berkeley in 1985. She is presently a medical consultant for the Regional Center at East Bay and is also assistant clinical professor of pediatrics at the University of California, San Francisco. She was married to Dr. Reg Louie in December of 1985.

James L. Madara of Lexington, Mass., was recently promoted to associate professor of

Pathology at Harvard Medical School. He was also appointed associate editor of *Gastroenterology*, a medical publication. He and his wife, Vicki, recently became parents of a son.

72

Ronald A. McAlpine, Harrisburg, Pa., has recently been named manager of distributed systems, with Pennsylvania Blue Shield in Camp Hill, Pa. He is responsible for the company's computer facilities. In addition to his degree he received from Juniata, he graduated from Shippensburg State College with a master's degree in business administration.

Susan (Hohl) Pecarich has recently moved to Pottstown, Pa., after spending 11 years overseas. She and her husband, Andy, are residing at 1282 Sheep Hill Road, Pottstown, Pa.

73

Sammy Kum Buo of New York, N.Y., has been appointed director of United Nations African Regional Centre for Peace and Disarmament in Lome. He took up his duties on February 10. Mr. Buo served most recently as political officer in the Department of Disarmament Affairs.

William H. Robison of Camp Hill, Pa., has recently been named the director, office

systems, with Pennsylvania Blue Shield in Camp Hill. He directs development and implementation of office automation and personal computing systems. Mr. Robison joined the company in 1980.

74

Eric Jahnke and **Sue (Bradley) Jahnke** are residing in Santa Maria, Calif. They have two children — Eric Vail, age 4, and Melissa Ruth, age 2½. Eric is a diplomate of the American Board of Gastroenterology and in private practice in Santa Maria.

David B. McDowell, Wilmington, Del., has been promoted to controller of Corrado/American and Affiliates. His wife, Lin, is employed as a meditation officer with the Family Court of Delaware. They are planning to move to Landenberg, Pa. this summer.

Francis L. White, Chicago, Ill., has opened a private law practice in Chicago. He and his wife recently became the parents of their first child, a daughter.

75

Jeffrey R. Longenecker of West Chester, Pa., was recently appointed vice president/chief financial officer of U.S. Vision, Inc. in Cherry Hill, N.J. In addition, he and his wife, Jayne, recently became parents of a daughter, Amy Frances Longenecker.

Robert N. Trigiano, Knoxville, Tenn., has been promoted to research assistant professor of the plant and soil science department at the University of Tennessee in Knoxville.

Kenneth J. Van Antwerp, Lititz, Pa., was recently appointed to the staff of Lancaster General Hospital. He is associated with the Lititz Family Practice Associates in Lititz. Dr. Van Antwerp received his medical degree from Temple University and completed a residency in family practice at Washington Hospital.

Waynesboro/Hagerstown Alumni Club

The Waynesboro/Hagerstown Alumni Club gathered at the Savoy Restaurant in Waynesboro on April 25. Featured speakers for the evening were David C. Beachley '77, the 1985-86 Annual Support Fund chairman, who presented an update on the Annual Support Fund. He was followed by Dr. Joseph V. Stewart, vice president and dean of academic affairs, who discussed "Juniata College — Today and Tomorrow." Patrick Fleagle '73 coordinated the event.

76

Jane (Jenness) Dickson, Herndon, Va., is currently a geologist with the U.S. Geological Survey at the National Center in Reston, Va.

Karen (Philhower) Griffiths, Wilmington, Del., is currently a fourth grade teacher in a small school in Wilmington.

Beverly (Baum) Schantz of Lancaster, Pa., has been appointed to the staff of Lancaster General Hospital. Dr. Schantz is affiliated with Anesthesia Associates of Lancaster, Ltd. She received her degree from Philadelphia College of Osteopathic Medicine. Following a residency in anesthesia at Hershey Medical Center, she completed an obstetrical anesthesia fellowship at the Hospital of the University of Pennsylvania.

77

David A. Corman currently resides in Hustontown, Pa.

Timothy M. Gorman of Dunbar, W.V. is currently employed by A.C. Nielsen Marketing Research as a district manager for West Virginia and southern Virginia.

Keith E. Hartman of Placentia, Calif., has been promoted to district sales manager of the West Coast Sales District for Micro United Computer Products.

Elvira J. Maniglia, Silver Spring, Md., is currently a chief resident in Neurology at Naval Hospital in Bethesda, Md. She will complete the residency program this fall.

Marcy Wagoner of San Rafael, Calif., is working in San Francisco as a field training consultant for Lotus Development Corporation, a software company.

78

Vincent A. Sarni, Jr. of Dubois, Pa., has been promoted to assistant product manager (Food Division) with Brockway, Inc. — Glass Container Division. He currently works at division headquarters in Brockway, Pa. His previous seven years with the firm were spent in sales.

Kevin W. Steckline, Norwich, N.Y., is working in the field of emergency medicine as a registered physician's assistant.

Huntingdon Area Alumni Club

The Huntingdon Area Alumni Club, under the leadership of Bob and Karen Orr '76 '76, held a spring buffet and theater program April 20 on campus. After a delicious buffet dinner of sauteed scallops and carved beef tenderloin, alumni and friends attended the production of William Saroyan's *The Time of Your Life*, directed by actress Nancy Kulp.

79

Barbara (Maxfield) Fitzsimmons, Corning, N.Y., is working as an occupational therapist and has a small counseling business.

Alison (Reeves) Johnson and her husband, Allen, reside in Mt. Airy, N.C. They have two daughters. Allen is a pharmacist in that area.

Barbara E. Linder, completed the engineering rotation program and recently acquired the position of diffusion engineer in Bipolar, III, one of Motorola's Bipolar IC process areas. Barbara resides in Chandler, Ariz.

Susan (Azar) Parson, Duncannon, Pa., is currently working with Nationwide Insurance in Harrisburg.

Susan R. Stapleton, Cleveland Heights, Ohio, is continuing post-doctoral work at Case Western Reserve University in Cleveland.

Mark J. Ickes, Fairmont, W.V., has a new position as manager of the Hess' department store in the Middletown Mall, Fairmont. He has been an assistant store manager of Hess' Francis Scott Key Mall store in Frederick, Md.

Carla (Cox) Jones, Pittsburgh, Pa., is currently a resident in child psychiatry at the Western Psychiatric Institute & Clinic at the University of Pittsburgh. Carla graduated from The Pennsylvania State University College of Medicine in May of 1985.

Jill S. Windwer of Guttenberg, N.J. has been appointed acquisitions editor for Law Journal Seminars Press which is a firm affiliated with the *National Law Journal* and the *New York Law Journal*.

80

Frances Freeburg of Charleston, S.C. has become the chef at Jilich's, an elite restaurant located in East Bay, Charleston, S.C.

Vincent C. Nardone, Meriden, Conn., is currently employed as an associate research scientist with United Technologies Research Center in East Hartford, Conn.

Charles E. Parson of Duncannon, Pa. is working as a social worker specializing in long term care at the Lewistown Hospital, Lewistown, Pa.

81

Mark E. Cassel of West Chester, Pa. has been named anchor reporter for WILM (1450 am) News Radio in Wilmington, Del. He may be moving to that area in the near future.

82

Sharon (Randolph) Klepfer of Upper Darby, Pa., has recently accepted a position with Smith, Kline & French Research Labs, Upper Merion, Pa. She will be an associate scientist in the department of molecular genetics. Her husband, **Douglas F. Klepfer** '81, will complete his residency program in June 1986, and will begin private practice specializing in podiatric medicine and surgery.

83

Cindy A. Foreman, Abington, Pa., is pursuing an MBA degree at Temple University and is employed as a medical technologist.

Christopher A. Johnson of Springfield, Va., is now deputy sheriff in corrections for the city of Alexandria. He began his new position April 1.

Shirley J. Parsons, Abington, Pa., has completed a program in occupational therapy at Jefferson Medical College in Philadelphia.

Cherie M. Sunday of Norcross, Ga., has been promoted to Lanier Business Products Home Office in Atlanta, Ga.

Ellen M. Zaleskie of Abington, Pa., is currently attending Hahnemann University in Philadelphia, Pa. pursuing a master's degree in physical therapy.

84

Robert R. Maruca is residing in Ashville, Pa., and is currently enrolled in his second year at Georgetown University School of Dentistry.

DeeAnn Nokovich, Athens, Ohio, is currently attending Ohio University enrolled in the doctoral program for industrial-organizational psychology. She is hoping to complete her master's work this spring.

Michael S. Spitz, Phoenixville, Pa., has been promoted to production biochemist at Centocor in Malvern, Pa.

Craig A. Stafford of Uniontown, Pa. is currently enrolled in his first year at Temple University School of Dentistry in Philadelphia, Pa.

Joseph Whitacre and **Yvonne (Wagner) Whitacre** are residing in Germantown, Md. Joe is working for Contel Spacecom and Yvonne is employed with Weaver Bros., Inc.

85

Todd A. Bush, Philadelphia, Pa., is presently attending Jefferson Medical School in Philadelphia. This was incorrectly reported in the January 1986 *Bulletin*.

Pamela B. Keeney of Bethel, Pa. began a new position as social worker at the Reading Hospital and Medical Center in West Reading, Pa. She began work on April 29.

George J. Plesce, Bensalem, Pa., is currently employed as an account executive with United Stationers in Pennsauken, N.J.

JUNIATA COLLEGE ALUMNI TOURS 1986-1987

BERMUDA AGAIN!

So popular that we're going for the sixth time and for four nights. \$555 includes airfare from Philadelphia, breakfast and dinner daily, transfers, and more. Hamilton Princess Hotel. Extras.

HAWAII YOUR WAY

We offer a deluxe, escorted tour of four islands with a small company specializing in Hawaii OR an independent trip you can take with friends or others who sign up, or do on your own. Add your name to the list for information.

TULIP TIME BARGING IN HOLLAND

After three nights in Amsterdam, board the M.V. Amicitia for cruising the waterways of Holland; touring in Amsterdam; then from boat many special visits (miniature city Madurodam, bulb fields, medieval banquet in ancient stable, street markets). All meals aboard ship.

PACIFIC NORTHWEST

Visit the Expo '86 sights in Vancouver and then include Victoria, Lake Louise, Banff for 10 days. All the mountain scenery you could wish for with excellent tour company. Seattle, too.

"THE" TOUR: AROUND THE WORLD

We're doing it again! By plane, train, bus to Moscow, Samarkand, Tashkent, Irkutsk, Peking, Shanghai, Suzhou, Hangzhou, Hong Kong plus "Trans-Siberian-Mongolian-China Express" from Russia to China. From New York about \$4100 for everything.

PROJECTED TOURS: (Who's interested?)

- SOUTH PACIFIC
- EAST AFRICA SAFARI
- TRINIDAD & TOBAGO NATURE TOUR
- FINLAND AND THE BALTIC
- ST. LAWRENCE SEAWAY CRUISE

Allison Elizabeth, born to **Susan (Lusch)** '81 and Dr. Thomas V. Stoughton of Augusta, Ga., on February 7, 1986.

Eric William, born to Denise and **Lawrence J. Rosage** '81 of Stillwater, Okla., on February 24, 1986.

Trustee Emeritus Succumbs

Denton B. Emmert '36, trustee emeritus, died April 22 after a long illness. He was 71.

A resident of Dearborn, Mich., Emmert served on the Juniata Board of Trustees from 1959-62 and from 1963-75. From 1950 until his retirement in 1974, Emmert worked for the Ford Motor Company and served as director of the company's Organization and Compensation Planning Office.

Prior to this association with Ford, he worked for the Securities and Exchange Commission (SEC) in Philadelphia and the F.B.I. in Washington, D.C.

An avid supporter of Juniata College and a member of the Founders Club President's Circle, Denton Emmert's assistance with numerous development campaigns helped insure their success.

Although he died before his 50th Class Reunion May 30-June 1, Denton Emmert's wife, the former Mary Keith '35, completed the class

questionnaire for her husband and returned it to the college. Her comments are a fitting tribute to her husband.

"Denton's interests were broad, beginning with his home and his family's pursuits as well as those of other young folks and older friends. He had a deep and exhilarative appreciation for nature which he photographed extensively throughout our travels. He loved music and was an avid attendee and supporter of the Detroit Symphony. He enjoyed games with the family

and joined in the spirit of football and baseball via television. He continued to have a very fine voice and enjoyed memories of singing in the college's varsity quartet. He enjoyed the opportunity of serving as a trustee of Juniata College and the emeritus status conferred on him. It has meant much to be in touch with college friends through all of these years."

In addition to Mary, Denton Emmert is survived by five children, including John W. '64, and nine grandchildren. □

Jack E. Oller '23 was Distinguished Juniatian

Jack E. Oller '23, a distinguished professor, community leader and world traveler, died May 20 in J.C. Blair Memorial Hospital, Huntingdon, after a brief illness.

A member of the Juniata Board of Trustees since 1974, Oller was a professor emeritus of French and director emeritus of the foreign languages laboratory. Oller taught at Juniata from 1927 to 1965 where he was one of the pioneers in using the conversational method of teaching, thereby replacing rote textbook learning with the more meaningful approach of having his students actually learn to speak the language. As a professor, Oller encouraged students to study abroad.

Oller also promoted the establishment of the college's modern foreign languages laboratory, which he directed until his retirement. He maintained an active interest in the facility until the time of his recent illness.

In addition to his distinguished teaching career, Oller was one of the few athletes to win varsity letters in football, basketball, baseball and track as a student at Juniata. He went on to coach basketball and golf at the college for several years and was a co-founder of the Indian

Club, the college's athletic booster organization.

Oller received his M.A. degree from The Pennsylvania State University, and also studied at Dartmouth College, The Sorbonne, University of Grenoble, University of Mexico and Middlebury College. Twice he has been honored by his alma mater for his distinguished accomplishments.

In 1980, Oller received the Alumni Service Award which noted, "For more than half a century, your consistent and energetic service has expressed your deep love and constant concern for Juniata."

An honorary Doctor of Letters degree was presented to Oller at Commencement ceremonies in 1984. Noting his many accomplishments, his degree read, "Through his travel, his photography, his considerable athletic accomplishments and his deep appreciation and love of France, we were enriched in mind, soul and relieved from pervasive provinciality."

Oller and his wife, the former Elizabeth Rohrbaugh '23, were well-known for their world travels, and Oller was a founder of Weimer-Oller Travel Agency in Huntingdon. He organized the

Jack E. Oller '23

Juniata College Alumni Tours program. Oller was an avid skier and golfer, winning several golf championships at the Huntingdon Country Club where he was a past president. He also served as president of the Huntingdon Rotary Club.

The Waynesboro native was born on Nov. 7, 1900 and his family has been actively involved in Juniata College since its founding. His grandfather, Jacob F. Oller, served on the college's first permanent board, formed in 1879. Oller's father, Joseph J. Oller, and brother, Jefford F. Oller '18, also served the college as trustees.

In addition to his wife, Oller is survived by a sister, Miss Rello Oller '20 and a sister-in-law, Mrs. J.F. Oller, both of Waynesboro. □

Donald S. Johnson Fondly Remembered

By Rev. John R. Rodland '61

Donald S. Johnson, professor of music emeritus, died April 5 at the age of 79. A member of the Juniata faculty from 1944 until his retirement in 1971, he was known to large numbers of Juniata alumni as "Prof."

Johnson was the director of the Juniata College Choir from 1952 until 1965, the college organist, and head of the music department, teaching classes in music education, conducting, and theory. He was also organist and choir director at the First United Methodist Church of Huntingdon from 1950-1981. He is survived by his wife, Margaret, and two daughters, Harriet and Claire.

We will all remember Prof in our own way. But, I remember him with great fondness as choir director, organ teacher, sight-singing and choral conducting teacher. I am sure that hundreds of Juniata College Choir alumni join me in remembering Prof's leadership in our annual choir tour, which took us on alternate years either east to Philadelphia, New York and Boston, or west to Pittsburgh, Youngstown and Somerset. We had wonderful times together under his fatherly guidance, knowing how much he cared for us and how he took such an interest in each of our careers. He reminded us to eat well and take care of our health, as he led us to musical excellence in each concert.

How grateful I am as a pastor and church musician to still be using anthems and great choral classics which Prof introduced us to in the Juniata College Choir. Prof had impeccable taste and he instilled in each of us a love for the best literature. He also had great faith in his singers as he challenged us to learn the music well and sing it from memory. I can never sing

Brahms' *Motet on the 51st Psalm*, Randall Thompson's *Alleluia* or Schubert's *Omnipotence* without remembering him with gratitude.

Prof also introduced us to the great oratorios as we prepared the Commencement weekend concerts. He was always ready to perform works which were little known, constantly broadening our knowledge of the vast choral repertoire. I remember vividly our performances of Handel's *Solomon* and Schubert's *Meriam's Song of Triumph*, and the privilege I had of accompanying them on the organ in Oller Hall. One of my fondest memories was the performance of Faure's *Requiem* which I accompanied, and which we sang with the choir of Susquehanna University.

In his organ teaching, Prof introduced us to the same high quality literature, and he supplied us with extensive repertoire lists. He put us in touch with the work of the finest organists by inviting at least one concert organist to campus each season and by studying with them himself during the summers. He would then share the results with us. I can remember working with the Reubke *Sonata on the 94th Psalm*, and copying the registrations and phrasings from his copy which he had learned from his study with Claire Coci. I also remember his frequent references to his own inspiring years of study with T. Tertius Noble at St. Thomas Church in New York, while he was a student at New York University. Prof was also very generous with his time, and on frequent occasions he drove us in his own car to distant places to hear organ recitals by famous artists. To this day, I remember our trips to Harrisburg to hear Catherine Crozier, to Camp Hill to hear Flor Peeters, and to

Donald S. Johnson

Uniontown to hear Hugh Giles.

In recent years, Prof enjoyed keeping in touch with us music alumni. A special joy for me was my visit to campus in October, 1984, at which time I played for him in Oller Hall. He listened to me and commented on the registration, and then invited me to his home on Mifflin Street, where we had spent many lovely evenings as students. He gave me some of his organ records and music which he thought I could use in my work. I treasure these symbols of Prof's life's work, and I pray that we can pass on a similar legacy to the next generation of church musicians.

Prof was from Saint Joseph, Mo. He earned his bachelor of science in music education and master of arts degrees at New York University. Further studies were taken at Bush Conservatory in Chicago, Christiansen Choral School, Juilliard School of Music, Union Theological Seminar School of Sacred Music and Alfred University Church Music Institute. Memorial gifts may be sent to Juniata College or to the First United Methodist Church of Huntingdon.

Editor's Note: Rev. Rodland is minister of music at the West Side Presbyterian Church, Ridgewood, N.J. □

Ralph H. Cool '26

... I could write a book on all the personal things I knew and loved about our grandfather Ralph, but I will try to describe him as best I can in this one page.

Born in 1902 near Harrisonburg, Va., he was the fourth of eight children. His family moved several times before settling in Wyoming, Del. Ralph graduated from Caesar Rodney High School in 1922, after deliberately repeating his senior year so he could help care for his ill father. He attended Bridgewater College the first year. His second and third years were spent at Blue Ridge College, before he left for Juniata and graduated in 1926. How he loved to talk about Juniata! I was surprised to learn that he was there only one year, because he spoke of Juniata as his only college. He spoke of and corresponded with friends he met there for the rest of his life.

At Blue Ridge, Ralph met Margaret Sigler, who also transferred to Juniata in 1925. They were married on February 22, 1930. He was a devoted husband and they both agreed he spoiled her.

I believe Ralph started with City Service Corporation in New York about 1938. He was moved to Lake Charles, La. around 1940 to help begin a new oil plant. He loved his work and talked of his job often. I know he was respected highly and well liked.

Ralph retired about 1950 after having lost one lung to cancer. They settled in Middletown, Md., Margaret's home. It was about this same time that my family moved to Middletown and we found ourselves neighbors.

The early years of our relationship I spent mostly with Margaret. She was not well and we sat for hours while Ralph worked around the house. He loved his garden and it was a showplace. During the difficult years of growing up, Ralph and Margaret were grandparents to me in the deepest sense of the word. They provided me with knowledge and wisdom that can only be "passed on" from one generation to the next.

Steve and I were married in 1972. It was in the next few years that Margaret's health declined rapidly. Our visits continued and I marvelled at the love and devotion they had for each other while she was so ill. Margaret died in 1975. I had promised Margaret I would take care of Ralph, but he did more taking care of me. He taught me to cook and can and garden. He advised Steve on his education and career decisions. And he listened. He baked pies and treats and brought them to me when I was tied down with little ones. Sometimes he even babysat.

Ralph Cool was the best example of a Christian I ever knew. He read his Bible and Daily Guidepost every single day. He gave of himself to everyone he met. Church was his only outside activity and to that he gave unendingly. He held every office except

Deacon (he said he wasn't worthy of that). He was a good neighbor and always was there whenever there was a need.

Ralph's hobbies were his garden, raising violets and reading. The garden never had a weed in it and produced more than any garden twice as big. His hundreds of violets were always in bloom. And he read almost constantly. He loved to read and wanted our children to love it too. All he ever bought them were books. Sometimes he asked me to choose books; mostly, he bought on his own. He chose books from National Geographic, Smithsonian, and World Book. Now our three children, ages six, eight and ten, are excellent readers and love books.

Ralph was a very special person to me and the bond between us will influence all of my life. He was kind and generous to everyone and he always smiled. He loved God, Margaret, Juniata and me.

EDITOR'S NOTE: Paula Kelly Biggs and her husband Steve (he served as executor of Ralph Cool's estate) were dear friends of Mr. Cool, who always spoke of them as grandchildren. When Ralph Cool died on January 10, 1985, his love for Juniata was manifested in a final bequest of \$137,000, part of which was used to establish an endowment in his and Margaret's names. His generosity thus ensures that his memory, and Juniata's lasting gratitude, endure long into the future. □
